

Intune for macOS

Intune provides device management of macOS devices in a single pane of glass

Most companies have a small set of macOS devices. With Intune macOS devices can be managed alongside Windows devices.

Manage corporate and personal iPhones & iPads in Microsoft Intune, or manage work apps only without requiring users to give up control.

Our service delivers these valuable outcomes

- ✓ macOS devices remotely provisioned and updated.
- ✓ macOS devices deployed without a personal Apple ID.
- ✓ Company Portal setup and configured for macOS devices.
- ✓ Deploy apps and operating systems updates remotely.

How it Works

1 **Step One**
Discovery
and Design

2 **Step Two**
Configuration
and Testing

3 **Step Three**
Knowledge
Transfer

“Technology is changing so quickly that my leaders, architects, and engineers can't keep it up with it all. Bringing in a niche expert like Mobile Mentor allows us to learn from their expertise.”

Jim Yukech
Chief Information Officer
