

# Free Microsoft Intune Proof of Concept Workshop

Master Device Management with an Intune Workshop from **LEVACLOUD** 

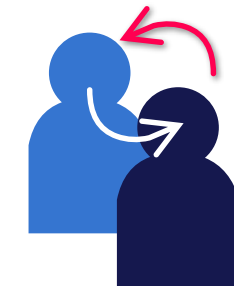

**Initial Briefing and Understanding:** Understand your specific needs, goals and existing environment. An overview of Intune's capabilities and potential benefits for your organization will be provided.

**Demonstration Setup:** Deploy a configuration of Microsoft Intune on a limited set of devices (up to 10) in your environment. We will assist with the first device.

**Feature Walkthrough:** Conduct a guided tour of Intune's capabilities using your actual devices. This could include a demo of device compliance checks, application management, Windows Autopilot zero-touch deployment.

**Questions and Debrief:** Answer any questions you have about Intune, discuss potential use cases in your environment, and outline the next steps towards a potential full deployment.
