Free Microsoft Intune Proof of Concept Workshop

Discover firsthand how to manage and secure your devices, your apps, and your users in your own environment

Microsoft Solutions Partner — Modern Work

LEVACLOUD

Workshop highlights

Experience real-time improvements to your Microsoft Secure Score with Microsoft Intune

Understand how to formulate management policies that protect your users, business data, and devices

Gain real-time insights about your users' endpoints and their compliance with your IT policies

Determine the most efficient way to provide your users access to the apps they need on their chosen devices

"Modern device management encompasses a wide range of areas including user protection, adding/removing devices, managed applications, end user support, and rolling out new capabilities."

—Forrester 2020 Microsoft 365 Enterprise Total Economic Impact Study

Why you should attend

This free, 4-6-hour workshop offers a hands-on demonstration of Microsoft Intune within your own environment. You will witness the deployment of a real configuration and the management of actual devices. By attending, you can:

* Understand how to leverage Microsoft Intune to enhance your management capabilities

* Discover how to secure your endpoints by enforcing robust policies and deploying potent security tools

* Learn how to fortify your users' identities with multi-factor authentication and conditional access from any device

* See how you can enable your users to be productive with their essential applications, on their preferred devices.

What to Expect

A comprehensive exploration into remote deployment, management, & security of corporate and BYOD devices, identities, and data within your organization. We aim to showcase the best practices for managing & securing endpoints at the enterprise level, using real devices in your environment for demonstrations. After this, we offer you the option to further enhance your security and productivity with our paid offerings.

Together, we'll help you:
•Expand your management capabilities with Microsoft Intune
•Secure your endpoints by enforcing stringent policies and deploying cutting-edge security tools
•Fortify your users' identities with multi-factor authentication and conditional access from any device
•Empower your users to be productive with their preferred applications, on their preferred devices

Don't miss out on this unique opportunity to see Microsoft Intune in action in your own environment.
