

UNIQUE CREATIONS

Orchestrating Smart Solutions

How to do it!

UC-Shoppe provides a professional and reliable foundation on which you can build an online store. We'll help you establish your brand online with a custom domain name. We also offer SEO and chatbot services, as so-called add-on services together with our shop management software.

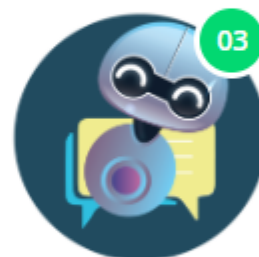

Product

Managing your online product catalogs and categories is no longer a cumbersome task. With UC-Shoppe, you can easily use the features such as product catalog, options and attributes, review and categories in the easiest way possible.

Sales and customer management

The ultimate goal of any business is to generate revenue by retaining existing customers and reaching more customers in a variety of geographies.

Chatbot

UC-Shoppe offers chatbot services as an additional function together with its shop management software. Interact with your customers around the clock via our additional function "Chatbot".

Why UC-Shoppe?

With UC-Shoppe, you can now manage all your online business functions on a single platform. Ensure more profitability for your business by setting up your own e-commerce website. You don't have to pay commissions to middlemen, agents, and distributors when you sell your products on major online trading platforms. Interact with your customers around the clock via our additional function "Chatbot".

Established business

These include retail stores, supermarkets, brick-and-mortar stores, wholesalers, manufacturers, restaurants, and many more.

New start-ups

Start your new business online with UC-Shoppe, which helps you reduce the cost of capital for a faster return on investment and more profit.

100% reduction in commission

Larger customer base

Faster recovery of investment costs

Increased profitability

Awesome features

UC-Shoppe has many outstanding features that will help you build your online business with ease. No more need to manage things across different platforms as UC-Shoppe is an all-in-one solution for any business to set up online.

Shipping Integration

The calculation of shipping costs is carried out by a user interface via rules, which is supported by an API, which gives you a high degree of flexibility in implementing different shipping scenarios. Integrate shipping capabilities directly into your online store.

Product catalog

The product catalog consists of a detailed list of a store's inventory, which can be viewed by the customer and contains all the data related to the products, including product images, descriptions, specifications, prices, etc.

Product Options and Attributes

Product options are used for products that have different variations associated with them, such as size, color, SKU, choices, checkboxes, or custom text. Product attributes include custom fields, brands, product visibility.

Customer Registration

Customers can register very easily as users of the website. With this new user registration feature, customers can view and edit account and profile information, view orders, manage passwords at a glance.

Additional benefits

SEO Services (Search Engine Optimization)

UC-Shoppe offers SEO services in addition to its standard modules, as setting up an online store is not the only way to help your business grow. It is very important to increase the visibility of your website from the circle of various competitors. SEO helps websites rank higher based on the keywords used in search engines and the number of clicks on the site. Without SEO for your online store, you may need to use paid traffic sources such as Adwords, Facebook ads, or sponsored products. By using SEO, you can position your website at the top, after which your online store will receive free and constant traffic.
