EXECUTIVE SUMMARY

Review Report

A review of the customer's current environment will be performed in reference to Azure Well Architected Framework. The results of this review will be documented in a report, which will utilize a Red/Amber/Green (RAG) system to highlight key findings within the cloud environment.

- Red designates items that are critical and should be fixed immediately.
- Amber are items of concern, which may require remediation or simply acknowledgment.
- Green indicates that the items that complies or acceptable.

Optimization Plan

A High-level optimization plan will be provided with details around each optimization suggestion.

Recommendations

All the recommendations will be summarized under following severities:

- High
- Medium
- Low

Operational Excellence   Security   Reliability   Performance Efficiency   Cost Optimization

Deliverables

Review report will cover the following areas:

Azure Foundational Elements:
- Tenancy, Subscriptions, Management Groups
- Naming Standards
- Resource Groups
- Resource Tagging
- Azure Policies and Initiatives
- Defender for Cloud
- Cost Management and Billing
- Identity and Access Management / Role Based Access Controls
- Azure Monitor / Log Analytics
- Key Vault
- Resource Tagging

Resources:
- High Level Summary of Deployed Workloads
- Consumption
- Backup
- Disaster Recovery

Networking
- Virtual Networks
- Connectivity
- Network/Application Security Groups
- Defined Routes
- Firewall
