"SPDockKit is a great way to see what is going on in your farm. No self-respecting SharePoint Administrator's toolbox is complete without SPDockKit."

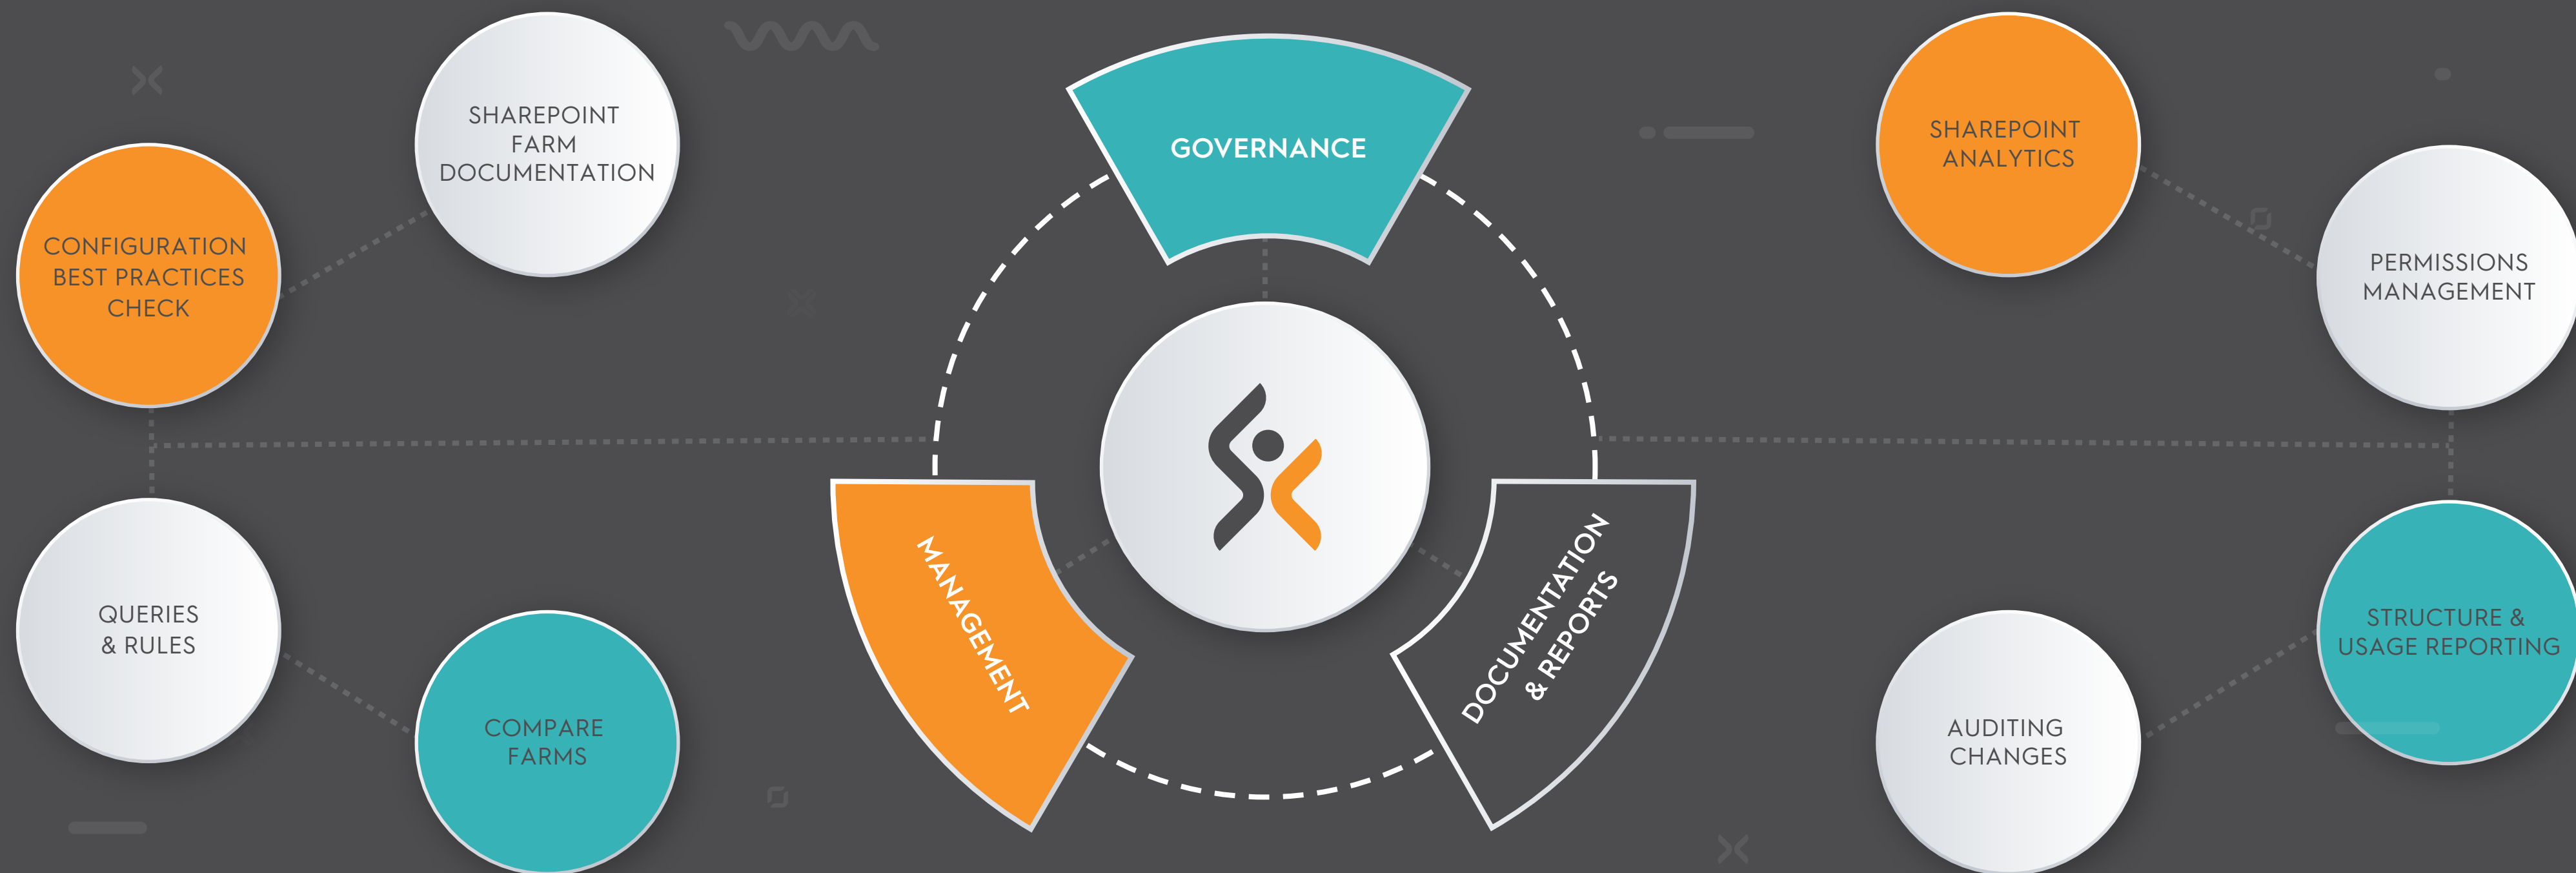

Todd Klindt

SPDocKit offers a multifunctional administration experience - use it for documenting, reporting and managing SharePoint farm.

Simplify day to day operations, analyze and document farm configuration, track who has access to what, and audit all changes across your site collections. **Get detailed information** about site collections' analytics, farm storage, structure and usage.

Keep your farm running smoothly, always be aware of changes, and how your farm is being utilized.

> Product features

Designed to make SharePoint admin and consultant life easier!

SharePoint Farm Documentation

- > Create professional-looking documentation file containing all SharePoint farm and Project Server settings.
- > Export to Excel, PDF or Word.

Analyze and Manage On-Prem Permissions

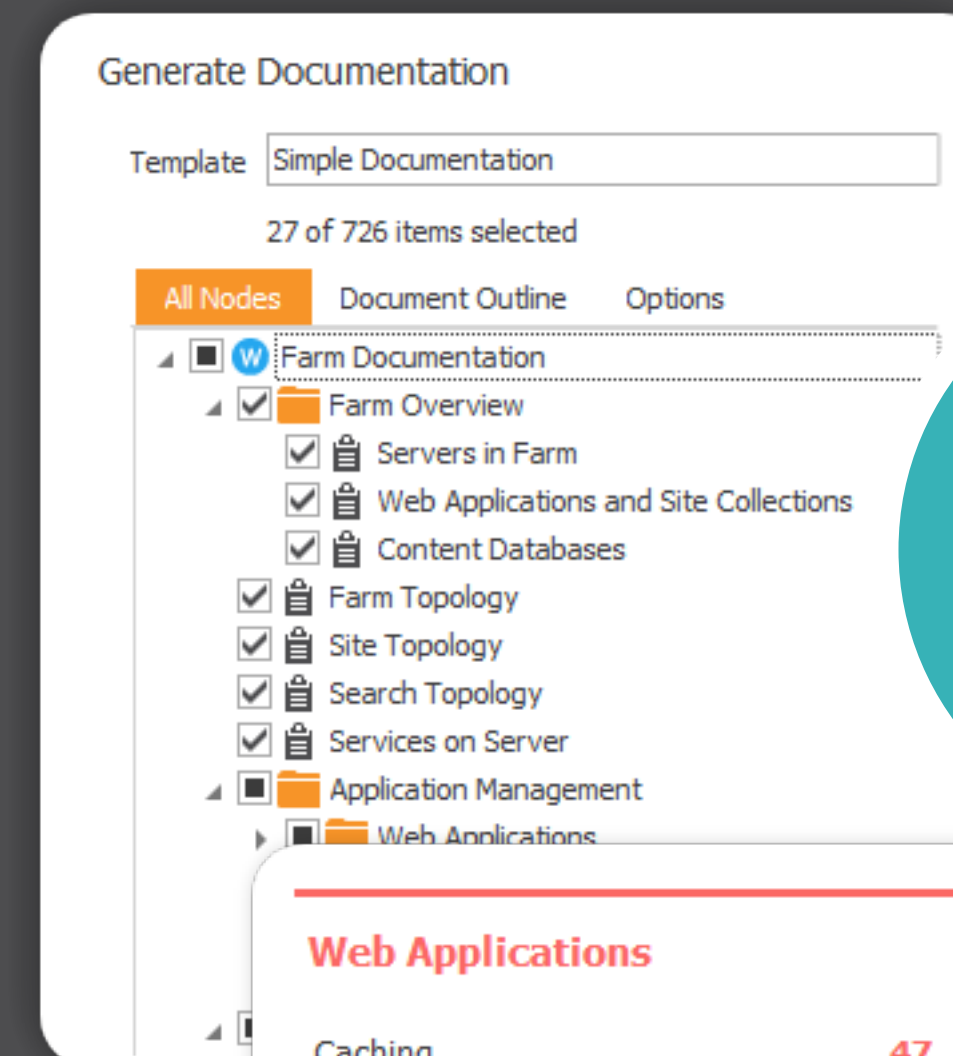

- > Explore permissions, audit changes and create various site and user specific reports.
- > Manage all user and group permissions and even restore permissions.

Best Practices Reports

- > Audit farm configuration and optimize it according to the latest SharePoint operational best practices.
- > Define your own best practices and export reports.

Compare and Track Changes

- > Compare SharePoint farms, Web Applications, Site Collections, Servers, Permissions and Web.config files.
- > Use snapshots to discover differences and track changes.

"I love this tool!"

Jim Ehrenberg,
SharePoint
Pros, Inc.

SharePoint Analytics – Site Hits, Visits and Modifications

- > Get an overview of how your site collections are being used – see most important metrics such as visitors, storage and subsites.
- > Check when was each site collection last accessed. Get list of site visitors.

SharePoint Audit Log Reports

- > Audit how data is being used and get an insight into important changes.
- > Filter, sort and analyze what your users did or changed on sites, lists, libraries, list items and files.

SharePoint Structure, Storage, Content & Usage Reports

- > Shows useful information about content database growth, used SharePoint space, site collection inventory, number of servers by role.
- > Check the content structure. Explore the usage of your content, workflows, and features.

SharePoint Queries and Rules

- > Enforce governance policies by setting up your own rules and implementing them on your SharePoint.
- > Audit rule efficiency by creating queries for a particular issue.

SPDockKit Benefits

Save time by automating routine administrators' tasks.

Increase data security and enforce governance policies.

Validate farm configuration. Track important changes.
