TOP FEATURES

Task Organizer

Ease to 'choose, add, and assign' the tasks in more efficient ways.

Task manager allows you to assign the respective projects and work to team members.

Geo-based Attendance

keeps a track of all that concerns you. It keeps you updated with the complete presence and activities of the employees.

It gives traces via GPS and other in-build software's that keep records of attendance.

Multiple Offices

You can control, create and add departments, distribute roles, give permissions to the employees for significant accesses, insert employee's respective locations and much more. This provides you with the liberty to manage your workspace in your own way. The team members can join and leave the channels as needed.

Task Checklist

Create multiple checklist for a task

Assign individual checklist
Add due date to the each checklist

Employee Management

Manage all the role based employees.

An organised way to manage your employees in more effective and simple

WHAT CLIENTS SAYS ABOUT MTIX360

Our teams tell us they're working together and solving problems much faster, because although they are spread over different locations, Mtix360 makes it like you're in the same room.

Mtix360 makes work seamless by allowing everyone to see what needs to be done, how, by whom and by when. I would definitely recommend Mtix360 to other managers.

It made our work life much easier. We have gained efficiency by saving hours of work every day.

I must say that only after using it I realized, that Mtix360 is the best project management and task management platform out there.

Mtix360 is just remarkable and very well designed.

When managing a business on a large scale you can't have a systematized working pattern if employees are working in the remote.

Coming together in Mtix360 channels allows us to discuss day-to-day management topics and collaborate in a better manner.
