

Modern Data and Analytics Platform

2 - Week Assessment

CONTACT US today to get started!

Assessment Overview

The **Microsoft Intelligent Data Platform** is a comprehensive solution designed to help businesses gain valuable insights from their data, leading to better outcomes, customer experiences, and innovation. Hitachi Solutions will partner with you to focus on the technology and processes that make up your organization's current data platform, help you improve data quality, increase agility, improve user adoption, compliance, and security, and enable faster time to insights – so you can focus on what matters most to your business.

Our **2-week* engagement** will help you identify areas in your current data platform in need of modernization. Our goal is to empower your organization with a detailed roadmap to lead you to improved business outcomes such as increased revenue, reduced costs, and improved customer satisfaction.

* If a customer's environment is complex, Hitachi Solutions can extend this offer (at an increased cost) up to 6 weeks.

Why Take Action?

- Your Data Scientists and Analysts need **powerful tools for integration, analysis and modeling** from large and complex data sets.
- Your Business Intelligence professionals need **self-service capabilities** to create interactive reports and dashboards.
- Your IT Administrators need to **simplify data management and governance** so they can focus on strategic initiatives, not data management tasks.
- Your Developers need a robust set of APIs and tools to **develop intelligent applications quickly**.
- Your Enterprise Leaders need to **make informed business decisions** based on accurate and timely data from across the enterprise.

Hitachi Solutions understands your data is unique to your business. This 2-week assessment is the first step in the journey to utilize the Microsoft Intelligent Data Platform to drive better experiences, business outcomes and innovation with your own data to deliver on the needs of your organization.

Outcomes

With this assessment, we'll support you in gaining **the insights, analysis, and recommendations you need** to successfully improve your data platform by delivering:

- A detailed, current-state report of your data platform and its ability to support business goals
- Process and technology recommendations for improvements to the data platform
- Identification of potential cost savings through consolidation and optimization
- A roadmap for future state data platform and next steps for achieving it

Following this assessment, you will have **a clear path towards business outcomes** including:

- Improved data quality
- Faster time to insights
- Increased business agility
- Self-service business intelligence
- Improved compliance and security
