

# Learn More About Modern Calling Capabilities

## Teams Calling Workshop

### Microsoft Teams as Your Phone System

Today's businesses need a modern voice solution and phone system that provides the same experience no matter where workers are. Calling in Teams provides the advanced features that organizations need to deliver seamless, collaborative experiences for employees, business partners and customers. Because implementation of Teams calling solutions can be complex and introduces risk, we always recommend bringing in a pro.

#### Teams Calling Workshop

Our Teams Calling Workshop is a modular engagement that lets you experience the vision for Microsoft Teams with Phone System capabilities and advanced communications scenarios. The workshop is designed to guide you through the process of a simplified enterprise voice solution with reliable, high-quality, integrated calling. Through a "art of the possible" demonstrations, use-case design, and deep-dive planning you will obtain actionable recommendations to successfully deploy and adopt Microsoft Teams Calling.

#### Workshop Deliverables

- An evaluation of your current telephony and PBX needs
- An evaluation of Microsoft calling plans and direct routing with on-premise or hosted SBC
- Environmental and workload analysis, including existing infrastructure and telephony state
- Demonstration of the end-to-end Teams Calling experience to showcase Microsoft Teams Calling as your telephony solution
- Direction on how to transition various user profiles into a modern collaboration and communication environment
- Showcase the rich portfolio of 3rd party applications and devices that can complement the Teams Calling experience
