

## Cloud cost optimization: 1-Day Workshop

As part of the workshop, we offer our clients an initial cloud cost optimization analysis. During the workshops we use the Spot by NetApp solution. It is a proven solution offered by NetApp. For this we use our knowledge and experience in cost optimization. As a result of the workshop, the client receives a report on potential cost reduction opportunities.

### Agenda

1. Kick-Off
2. Researching the needs. At this point, it is crucial to know the client thoroughly. We examine business needs and assess the current state of IT infrastructure (applications, systems, architecture).
3. Collecting data with the NetApp Spot tool.
4. Discussing the results of the report and presenting the plan of next steps.

### Main benefits:

- Simplify and automate cloud operations.
- Deliver applications faster and more reliably.
- Maximize the value of your cloud investment.

**Trek2Summit is a team of experts specializing in customer digital transformation projects. We help businesses elevate their value through the cloud. We have many satisfied clients in various industries, such as finance, e-commerce, logistics, pharmacy, etc. all over Europe. Feel free to contact us, and let's talk about your business needs.**
