

Company brochure

Eye Security is the first company in Europe to offer a high-quality and affordable cyber solution including insurance to make the cyber threat in SMEs manageable. We combine a best-in-class security team with proven technology and an insurance to fully unburden entrepreneurs.

eye am here for your business

Cyber threats have been around for a long time, but it is only recently that companies have begun to acknowledge the true danger they pose. Eye Security is the first European company to offer a data-driven solution that combines high-quality technology with cyber insurance.

One solution that takes away your cyber risks

- ✓ Team of experts with extensive experience
- ✓ Recognized by international brokers and insurers
- ✓ Implemented within 24 hours
- ✓ Affordable, no nonsense and easy acceptance insurance

Choose the plan that suits your business

Every organization faces its own cyber threats. Our packages are a proven combination of security measures to fully protect companies in every industry.

Protected

Keep your business safe with our high-quality cyber package that combines technical measures with phishing simulations and yearly advice.

- MDR-service for 24/7 monitoring
- Yearly advice by premium experts
- Phishing campaigns
- Four hours of incident response

Protected + Insured

You no longer have to worry about cyber risk. With our cyber package, including insurance, you completely remove the cyber risk from the balance sheet.

- MDR-service for 24/7 monitoring
- Yearly advice by premium experts
- Phishing campaigns
- Four hours of incident response
- Cyber insurance to cover the residual risk

Trusted security partner

Our goal is to protect businesses across Europe. In order to do this, we work with partners on combined solutions that make a difference in the fight against cybercrime.

In addition, we work closely with our customers' IT suppliers to jointly keep the IT infrastructure reliable and secure. Because we are entrepreneurs ourselves, we appreciate that our clients trust us as their security partner.

Acknowledged by

"The fact that I have the people from Eye detecting anomalies on our network, and can therefore quickly identify incidents, gives me considerable peace of mind. That means I can focus on other things. It feels like specialists have got my back."

Peter Onland
IT-Manager at Signature Foods

About Eye Security

Eye Security was founded by employees of the Dutch Intelligence and Security Service. After years of campaigning for national security, they noticed that there was no suitable cyber solution for SMEs. As a result, Eye Security was founded in 2019. Eye Security is the first company in Europe to combine high-quality technology with insurance to counter the ever-growing ransomware attacks. The company has now developed a proven method that secures and unburdens companies on a large scale.
