

# Zero-Touch Provisioning

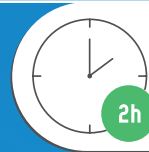

**“This is a huge breakthrough for us, we are thrilled and will now migrate 1,000 devices to Modern Management with Intune.”**

- Kyle Rucker, Director of Information Technology

Provisioning devices has been a manual process for almost 30 years, taking up precious IT time and costing money.

**Zero-Touch Provisioning** enables you to order laptops, tablets, and smartphones to be shipped directly to your employees. When your employee signs-in, your security policies, applications and content are all configured automatically.

**2 Hours**

Time to image and fully provision a Windows device

**Up to \$250**

Cost of imaging a Windows device in healthcare

## Step 1 Design

We design the Zero-Touch Provisioning process for your Intune environment and submit it for your approval.

We design a standard set of device management policies and profiles for Windows 10, macOS, iOS and Android.

Design

## Step 2 Implementation

We implement the approved design and integrate with Microsoft Autopilot, Apple Business Manager, Android Enterprise and Samsung Knox – as required.

Implement

## Step 3 Demonstrate and deliver

Demonstrate automated provisioning for Windows, 10 macOS, iOS & Android.

We provide hands-on training for system administrators with as-build documentation.

Demonstrate
