As more IT systems shift to the cloud, organizations continue to push more cloud technologies and solutions into their digital transformation portfolio. This requires security teams to secure not only existing infrastructure, but also learn, train, and adopt new approaches to incident response. When a cyber security incident occurs, the need to quickly identify, contain, remediate, and report a security incident is crucial to an organization’s financial, reputational, legal, and operational risk.

KPMG LLP (KPMG) can help you protect critical business processes, assets, and data from cyber-attacks. We combine extensive industry, business process, and consulting experience to develop and implement advanced Microsoft technology solutions. KPMG provides transformation services across the entire cloud lifecycle, and we are a recognized leader in global cyber security.

From strategy and transformation to defense and response, we leverage Microsoft technology to help you:

- Manage secure identity and access with one universal platform
- Defend and protect every layer of infrastructure, data and resources.
- Prevent cyberattacks with integrated and automated security
- Protect, discover, and classify sensitive data in any location
- Manage cloud security and safeguard cross-cloud resources.
Why KPMG and Microsoft?

Cyber risks can affect brand reputation, investor confidence, customer experience, product integrity and much more. Leveraging tools like the Microsoft Azure Cloud environment, Microsoft 365, and Microsoft Sentinel, KPMG cyber security professionals help you to:

- Respond to threats faster and reduce actual security risks and the magnitude of risks
- Decrease your time to implementation or go to market
- Gain cost advantages as a result of greater efficiency
- Increase work productivity with Microsoft 365 collaboration
- Foresee issues and respond before they become a reality

Enhanced security through simplified and intelligent security management with Microsoft.

Visibility
Understand the security state and risk across resources.

Control
Define consistent security policies and enable controls.

Guidance
Elevated security through built-in intelligence and recommendations.
Core offerings

Futureproof Identity and Access Management
Consolidate identity and access management platforms to reduce costs and increase agility

Microsoft 365 E3 to E5 Migration
Rationalize security tech stack using capabilities available in Microsoft 365 E5 license

Beyond Microsoft 365
Secure global rollout of Microsoft 365

Zero Trust Foundation
Build roadmap to enable Zero Trust across your hybrid cloud environment

Modernize Security Operations
Modernize security operations with KPMG Powered Enterprise and Sentinel

Security Posture Assessment
Baseline your security posture with a security posture assessment

Microsoft Azure security accelerators
Increase speed, agility and scale by leveraging KPMG accelerators to analyze, configure, and operate much faster in Microsoft Azure security environments.
