Innova Solutions for Power Platform – Assessment to Adoption

Microsoft Low Code: A **Simpler**, **Quicker** way to Accelerate & Innovate

"**Innova Solutions for Power Platform - Assessment to Adoption**" is our service to help enterprise customers accelerate their Power Platform adoption journeys. Whether you are looking for a comprehensive assessment of your existing Power Platform usage, or **a customized adoption strategy to streamline your business processes and workflows**, Innova Solutions can help you achieve your goals.

Our team of experts can help you design, develop, deploy, and manage Power Platform solutions that align with your business needs and objectives. We can also offer much-needed training and support to help your users leverage the full potential of the Power Platform.

Long story short, with Innova Solutions, you can transform your data into useful insights, your insights into necessary actions, and your actions into measurable outcomes.

Why are Clients Choosing Innova?

Innova's expertise in Power Platform solutions, together with the industry best practices, empowers your enterprise to accelerate and innovate its digital transformation for business processes.

With our extensive services, you are never a lone ranger. We help enterprises leverage Power Platform products to build a solid foundation and realize business value from the early days of adoption. Our support encompasses everything ranging from initial envisioning workshops, assessments, pilot, and solution build support to deployment, support, and maintenance.

Our services can help you:

- Meet demand faster with App Development and Intelligent innovation!
- Reduce costs by leveraging your existing investments in M365 & Power Platform licenses.
- Enhance seamless integration and scalability with 1000+ out-of-the-box connectors and integration with Azure services.
- Improve Productivity, Accelerate Automation, and get an impeccable employee experience.

Innova Power Platform Portfolio Solutions

Business Case
- License Analysis
- Current State Analysis

Data Insights
- Ad-hoc Analysis
- Live Dashboards

RPA
- Governed and Ungoverned RPA

Power Apps
- Modernize Legacy Apps
- Automate Paper processes
- End-to-End Intelligent automation
- AI Builder - Building and training AI models
- Effective building of canvas, model-drive and portals
- Power Apps in MS Teams

Operations
- Power Platform Administration
- Governance
- User Security
- Environment and Solution Management
- Optimization
- Monitoring

Power Automate
- RPA with UI Flows and Power Automate desktop
- Automate and Integrate Business Processes using Automated approval and Button Flows
- MS Teams invoked flows and adaptive card model flows
- Data Operations with Flows

Virtual Agents
- Building Powerful and Intelligent Bots
- Publishing Bots to live Sites and MS Teams
- Analytics for Bot Enhancement
