Microsoft Intune has enabled Modern Device Management

Microsoft Intune enables **modern device management** for the remote workforce

Desktops, laptops, tablets and smartphones can all be managed over-the-air

A successful Intune implementation requires the right policies, profiles and rules

Mobile Mentor's Intune Security Baseline is a proven configuration that works

Mobile Mentor is a Microsoft Gold partner. You are in safe hands.

MM mobile mentor

Step 1: Discovery

Mobile Mentor performs a short technical discovery to understand your business, existing security policies and priority use-cases

Microsoft®

MM mobile mentor

Step 2: Configuration

We configure your Intune environment with security policies, profiles, compliance rules.

These are proven configurations, adapted to your business and security requirements.

Azure Active Directory

Azure Information Protection

Intune Device Enrolment

Intune App Protection Policies

Azure Conditional Access Policies

Microsoft

Step 3: Knowledge Transfer

Our Microsoft certified engineers transfer knowledge to your Intune Administrator(s) through a hands-on training session.

We also provide a technical document that explains the Intune Security Baseline.
