

## Solution Brief

# BlueVoyant Microsoft Defender for Cloud Workshop

## Learn how to optimize Microsoft Defender for Cloud to better protect your cloud infrastructure

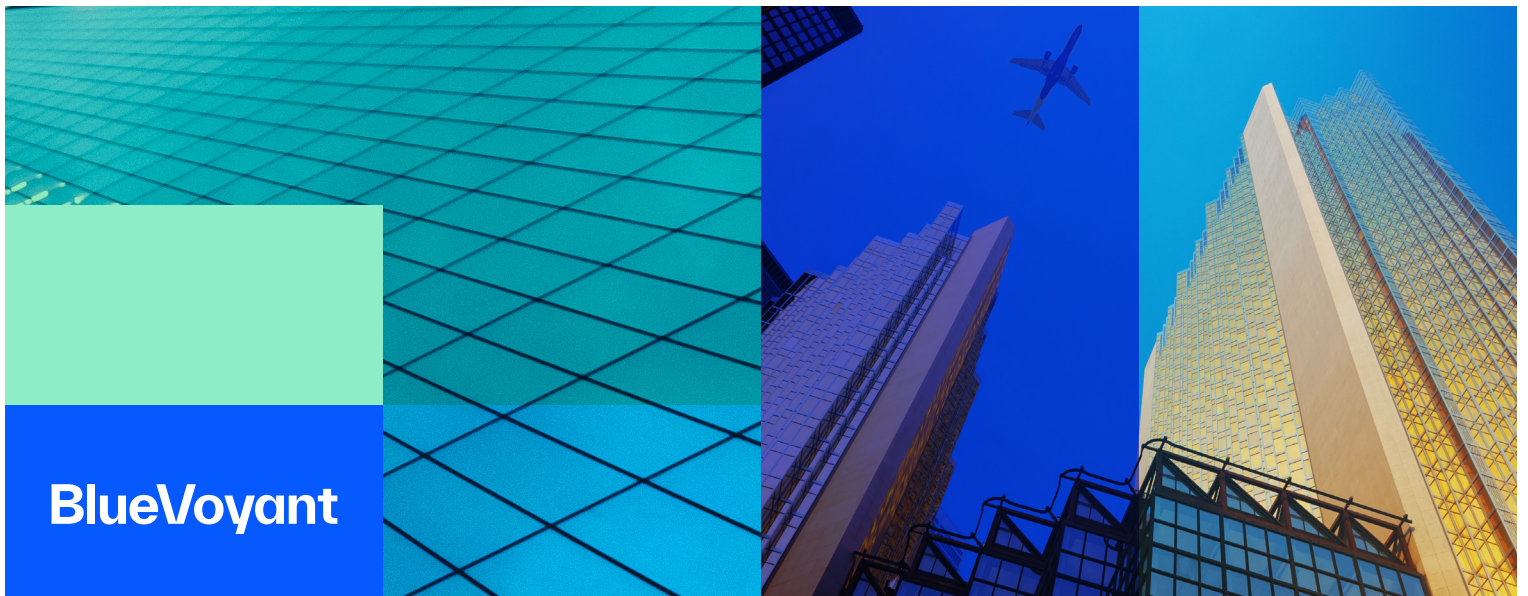

### Are you getting the most out of your Defender for Cloud investment?

Microsoft Defender for Cloud is a great security tool for protecting your cloud infrastructure. However, do you fully understand your security responsibility in that data flow? Are you aware of all the workloads you are running in the cloud? Are processes in place to help you effectively and securely scale?

**BlueVoyant's Microsoft Defender for Cloud Workshop** will help your technical teams understand how to utilize Microsoft Defender for Cloud to its fullest potential to protect your cloud infrastructure, as well as convey meaningful data to senior management.

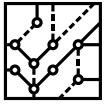

### Key Differentiators

- > BlueVoyant won the Microsoft's 2023 Security MSSP of the Year award.
- > Our cloud-native organization has the expertise to help secure your environment regardless of whether you are in a single, multi, or hybrid cloud environment.
- > BlueVoyant's approach, based on our holistic IaaS Cloud security framework, identifies quick wins as well as strategic initiatives for long-term security.

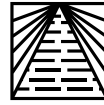

# Offerings

## Understand

BlueVoyant will conduct a pre-workshop survey to collect some essential, non-proprietary data to better understand your organization's current cloud security capabilities and pain points.

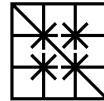

## Evaluate

BlueVoyant will review key Defender for Cloud metrics including Secure Score, Industry Standard Benchmark, Vulnerable Machines List, Permissions Creep Index, and Cost Estimator. These metrics will offer a snapshot of your organization's multi-cloud security posture, as well as provide an estimate of costs for the Defender products upon trial expiration.

## Educate

Our advisors will introduce your organization to the terminology and metrics which Microsoft Defender for Cloud utilizes for multi-cloud security and explore "out of the box" capabilities available to you and your team. Additionally, we will familiarize your team with the dashboards and capabilities provided within Microsoft's ecosystem and demonstrate how to customize functions and reporting.

## Recommend

Our cloud security experts will suggest remediations and strategic recommendations for your organization to improve your overall cloud security program. The workshop will help your technical teams understand how to utilize Microsoft Defender for Cloud to its fullest potential to protect your cloud infrastructure, as well as convey meaningful data to senior management.
