

LIGHTHOUSE **Protect & Govern Sensitive Data Workshop**

A hands-on engagement delivered in a workshop format with everything you need to better discover, protect, and govern your corporate data.

Overview

DOCUMENT

Document compliance objectives and strategy including Teams compliant deployment and use.

DEMONSTRATE

Identify potential risks from dark data. Demonstrate how Microsoft 365 can accelerate your compliance journey.

RECOMMENDATIONS

Provide actionable next steps that protects against potential privacy and regulatory risk from dark data.

Discover and address risks from dark data

Not long ago, managing data just meant dealing with documents and emails. Pervasive digital technology and the rapid shift to remote work have greatly expanded the information universe. Much of that data becomes stale or unused immediately after creation and contains information that could impose a compliance risk. Over 80% of corporate data is dark, which means it is not classified, protected or governed.

At the end of this workshop, experts in Microsoft technologies and compliance will provide you with:

- Data Risk Check report that includes findings and insights from the automated discovery process.
- A list of recommendations and actionable next steps to mitigate the identified privacy and regulatory risks.
- Insight into Microsoft's approach to mitigating and controlling privacy and regulatory risks as well as understanding how to leverage Microsoft 365 tools.
- Purview Compliance Manager Tenant Assessment report with suggestions and top key improvement actions.
- A set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps.

Why Lighthouse?

For more than 25 years, Lighthouse has been providing global security and compliance advisory solutions combining decades of industry experience and best practices with leading edge technology driven approaches to help organizations confidently achieve scalable, practical success.

Our unique expertise in security, compliance, and legal together with deep expertise in the Microsoft M365 and Purview technologies results in a full breadth of Microsoft security and compliance offerings and a track record of collaboratively supporting Security, Compliance, IT, and Legal business decision makers for measurable results.
