

Microsoft 365 Defender Suite Pilot: Endpoint & Office 365 Protection

Enhance your security posture & protect your Microsoft 365 workloads, leveraging the tools you already own or are adopting.

Workshop highlights

Understand the scope & design possibilities for protecting your organization with Microsoft 365 Defender Suite

Assess your current security posture & receive a personalized timeline for potential threat mitigation

See how the protection can be extended to more users and devices with Microsoft 365 Defender Suite

Get insights into how Microsoft 365 Defender can be integrated into your security operations to reduce overhead

Design & Deploy for Your Unique Needs

To effectively defend against advanced threats, you require a deployment plan tailored to your organization's unique needs and current security posture.

The Microsoft 365 Defender Suite Pilot is designed to give you a clear understanding of the suite's capabilities, showing you how it can increase user and device protection, and reduce the attack surface across your potential Microsoft 365 workloads.

What You Will Learn:

- How to discover, prioritize, and remediate existing security threats and vulnerabilities using Microsoft 365 Defender Suite
- How to use Microsoft 365 Defender Suite to potentially prevent sophisticated attacks
- The benefits of integrating Microsoft 365 Defender Suite into your security operations for ongoing security monitoring and incident response
- How to continually improve your security posture and increase protection for your users and devices

What to Expect

- Expert guidance on how Microsoft 365 Defender Suite could be integrated into your security operations, potentially reducing operational overhead
- An overview of user & device protection using Microsoft Defender for Office 365 & Microsoft Defender for Endpoint
- A walkthrough of how to identify vulnerabilities and threats, with potential mitigation strategies
- Learn how to prioritize and mitigate potential threats to email, identity, and data with Microsoft 365 Defender Suite
- An action plan to potentially minimize the attack surface across all your Microsoft 365 workloads
- A personalized roadmap, including a timeline for remediation, based on your organization's hypothetical security needs and objectives
