# Introducing KPIGPT: Capabilities and Offerings

Customizable solutions to securely bring ChatGPT capabilities to enterprises

KPIGPT provides an efficient, quick to deploy, solution for enterprises that want to offer the functionality of a conversational AI tool such as ChatGPT in a secure and customized way.

Our accelerators integrate with existing Azure infrastructure and the Azure OpenAI APIs.

ACCELERATING VALUE-DRIVEN TRANSFORMATION

TAILORED SOLUTIONS FOR LINE OF BUSINESS EXCELLENCE

PRECISION AND OPTIMIZATION

KPI can help you quickly analyze use cases, infrastructure and feasibility to custom design a companywide Generative AI roadmap that drives value for your business.

Q&A over internal documents and custom moderation, API integrations, and more. It is designed to support specific Line of Business use cases at scale: IT, HR, support, etc.

Fine-tuned models for specific use cases and cost optimization and Power BI integration for advanced analytics
