

E-Visor

Viva Connections

Enhancing employee interaction with high-level security and productivity

CONTEXT

30%

of workers

are losing physical and emotional connections to their team, and the wider organization, due to remote work.

15%

decrease

in the ability to meet, collaborate, and generate ideas.

Security and compliance

remain additional challenges to face.

WHY VIVA CONNECTIONS?

Microsoft Viva Connections is a mobile and desktop platform that provides modern employee experience designed to engage and inform users. It brings a personalized destination where they'll discover relevant news, conversations, and the tools they need to succeed, enabling quick and easy access, whether they are in the office or in the field.

- Simple configuration from existing content in SharePoint
- Users can access company news, policies, and other published information
- Unified ecosystem that provides personalized landing pages, connecting employees and organizations
- By surfacing content in single hubs, Viva Connections increases and encourages employee connection across the entire organization

Viva Connections uses dynamic cards that employees can interact with to complete simple tasks or review critical data. It also brings the organization's line-of-business apps into a unique dashboard. Viva Connections is authored in SharePoint and can be published to the Viva Connections Teams mobile app..

E-VISOR FOR VIVA CONNECTIONS

E-Visor is an analytics solution with advanced alerts and notifications capabilities, that helps end users boost their security and productivity, directly from within Microsoft Teams, by collecting data across different Microsoft portals to present it back to end users in a single location. Special integration with Viva Connections generates an application designed for different audiences, such as end users, managers, and IT, enabling them to know what is happening in the organization, identifying the who, what, when, and where, and execute risk mitigation actions.

Viva Connections

HOW DOES E-VISOR ENHANCE THE VIVA CONNECTIONS EXPERIENCE?

E-Visor efficiently uses the cards experience provided by Viva Connections to bring a high-level view of Modern Work and cybersecurity activity for end-users, teams, and the organization. It can be accessed through the intranet and SharePoint home sites.

WHY E-VISOR FOR VIVA CONNECTIONS?

E-Visor complements the Viva Connections experience by adding components that strengthen the organization's security strategy. E-Visor simplifies the technology management process by empowering users and effectively communicating topics of interest about Modern Work and cybersecurity, with an aim to simplify day-to-day tasks, reducing security risks and response times, and enable proactive decision-making

 **FOR END-USERS:** E-Visor for Viva Connections empowers users by providing a simple way to perform tasks and high interaction.

 **FOR TEAMS LEADERS:** Provides high-level analytics about their employees' activity.

 **FOR ORGANIZATIONS:** Enables comprehensive visibility of the organization's users to optimize decision-making processes.

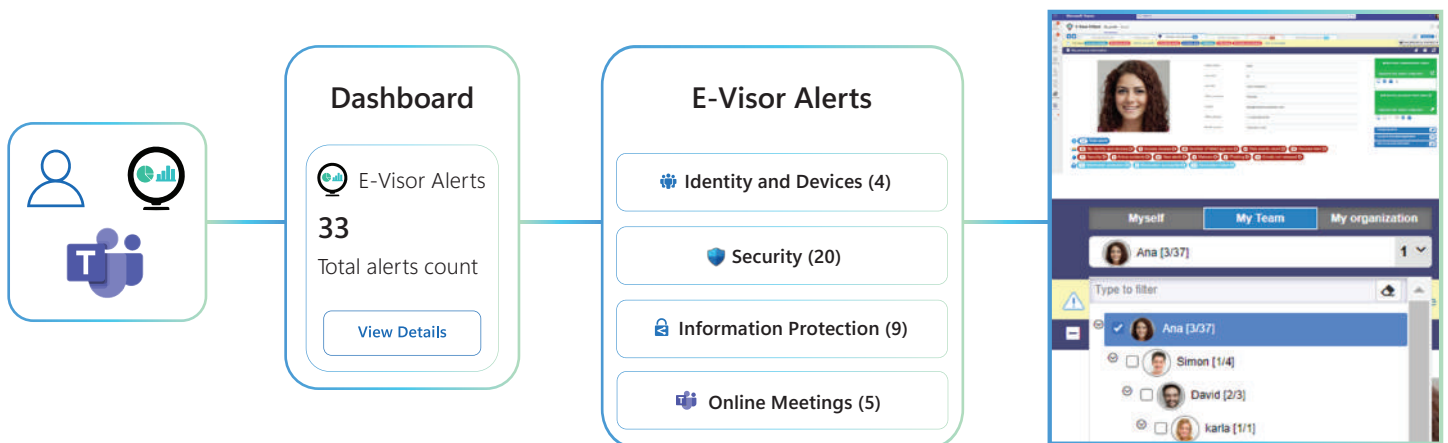

EASILY ACCESS YOUR PERSONAL, TEAMS, AND ORGANIZATIONAL INFORMATION FROM THE SHAREPOINT HOME SITES AND MICROSOFT TEAMS

E-Visor for Viva Connections provides customizable cards that summarize activity with visuals to support the end user, manager, and IT experience*:

* Information displayed to end users is customizable according to the specific needs of the organization.

COMPREHENSIVE VISIBILITY WITH INTUITIVE VISUALIZATION CARDS

USE CASE I

Act on security alerts by clicking on the corresponding card

Get reports and analytics from the activity of users, teams, and the organization...

... and go as deep as you need with advanced analytics capabilities in the E-Visor Teams App.

USE CASE II

Visibility and analytics about collaboration activity in Microsoft Teams

E-Visor Teams App provides additional strategic data for better decision-making.

FAST START AND INTEGRATION

Get your pre-requisites ready: Integrate pre-existing cards into SharePoint and Microsoft Teams

Educate users and deploy the pilot: Prepare content for the feed and configure settings

Massification: Launch with end users and empower technical and business decision makers with the right information from SharePoint and the Teams app

SOLUTION BENEFITS

- Consolidated view of end user information in one unique console
- Single application natively integrated with Microsoft Teams
- Easy deployment and management for end users, team leaders, and administrators
- Save time and money by using a single location to notify, track, and connect with users
- Improvement in user experience
- Robust tracking and reporting
- Automated provisioning and deprovisioning of features and capabilities
- Built for Microsoft Teams

WHAT ORGANIZATION IS THIS SOLUTION FOR?

Any organization looking to:

- Reduce administrative tasks and costs
- Provide a better experience while accelerating productivity
- Consolidate administrative views
- Simplify processes through automation
- Track activity
- Securely provision access

WHY TRUST YOUR PRODUCTIVITY AND SECURITY STRATEGIES TO SYNERGY ADVISORS
