Implementation Methodology

Cloud Based ERP System

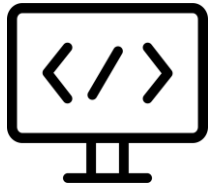

Analysis

We analyse your system and create a as-is-to report. Here we set the customization points

Design

We design the pages as per your requirement which we have analysed in the Analysis stage

Development

Backend coding are done to make the pages live.

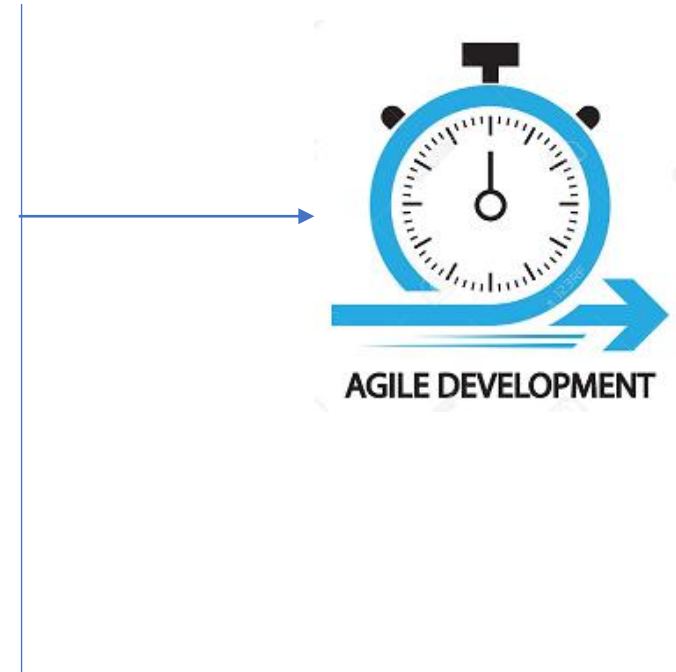

Deployment

We make deployment module wise. The customization made deployed for user testing

Training

Interactive (both classroom / online) training are provided in batches. We first train the key person / department heads so they can train other staffs.
