RESPOND Framework for Sustainability Engagements

A consultative approach to execute your Sustainability journey

Communicate more effectively with stakeholders and maintain transparency on the value add to Environment, Economy and Society

Over the years, the discussion on sustainability has evolved and transformed into an important board room agenda. Enterprises are taking a deeper look at their business operations and flow of materials to elevate how products, services, or resources are renewed or regenerated.

Achieving sustainability is a long-term goal, and technology has a significant role in success. Sustainability is intrinsically coupled with Enterprises' digital strategy. It plays a key role in shaping the future of technology and business operations, and those who lead the way can make a difference that transcends short-term financials

At Infosys, we have created a consulting offering that will Empower your teams to define Sustainability journey and roadmap, track Sustainability and its associate parameters, Automate to accelerate on sustainability initiatives.

Why customers use this framework?

- Structured approach to Sustainability Engagement

- Sustainability Maturity Assessment

- Access to Industry Standards, Best Practices and Thought Leadership

- Reusable Consulting Resources and Templates

- Experience based recommendations
