

# Microsoft Entra Verified ID Proof of Concept

## About Oxford Computer Group (OCG):

OCG offers a comprehensive consulting suite for HR and IT services tailored specifically for verifiable credentials. Our 20+ years of identity consulting make us uniquely positioned to integrate verifiable credentials into the rest of your organization's identity infrastructure.

## About Microsoft Entra Verified ID POC

Fraud prevention is always a priority when doing business, but current methods like passwords, ID cards, and certifications are expensive, difficult to secure, and raise privacy concerns.

With Microsoft Entra Verified ID, organizations can automate credentials verification and enable privacy-protected interactions with their users - all while seamlessly integrating with their existing security infrastructure. Further benefits include:

- Reduce risk of fraudulent transactions and phishing attacks
- Reduce operational costs and automate administrative processes, including audits
- Enhance privacy protection and controls
- Provide an improved experience for employees and other end users
- Empower users with ownership of their own digital credentials

To help our customers discover the benefits of authentic verifiable credentials, we offer a Microsoft Entra Verified ID Proof of Concept (POC). The POC starts with in-depth discovery to discern business goals and challenges, and is followed by a custom implementation and deployment of Entra Verified ID.

Verifiable credentials can help your agency improve security, reduce fraud, provide a better user experience, and accelerate digital transformation.

# Why Microsoft 365?

## Save your company money

Microsoft 365 is available as a simply, monthly subscription. Avoid large up-front costs for new software while moving the cost of IT from capital to operating expense. And without on-premises servers to run email, websites, and document storage, you can reduce energy costs and save by no longer purchasing new server hardware.

## Scale your business quickly and flexibly

Microsoft 365 grows with you on the Microsoft Azure cloud. Adding a new user is as simple as buying an additional license, which allows access to business-critical technology on up to five PCs/Macs and five mobile devices. Microsoft 365 provides many plans to fit the right capability needs and price points for each user in your organization.

## Technical support

Your Microsoft 365 subscription comes with 24/7 support from a global network of experts, with one-hour response for critical, service-impacting events.

## Financially backed SLA

Get peace of mind knowing your services are available when you need them with a financially backed, 99.9% uptime service-level agreement.

## Simplified IT management

Reduce headaches by reducing your IT infrastructure. Content lives safely in globally distributed data centers with continuous backup and disaster recovery abilities.

## Key use cases

### Business-class email

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

### Cloud storage

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

### Meet online

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

### Collaborate, chat privately

Accelerate your mobile app development by using a backend hosted on Microsoft Azure.

## Microsoft 365

Microsoft 365 is a cloud-based subscription service that brings together the best tools for the way people work today. By combining best-in-class apps like Excel and Outlook with powerful cloud services like OneDrive and Microsoft Teams, Microsoft 365 lets anyone create and share anywhere on any device.
