

UNLEASH THE TRUE POTENTIAL OF YOUR APPLICATIONS

With CDW's Azure Application Modernization Journey

Unlock App Excellence. Thrive with Modernization.

CDW's Digital Velocity team lives and breathes modern application development, and we're here to make it simple for you. Introducing our **Application Modernization Journey**—the perfect path to elevate your apps. Our experts can guide your organization through discovery, planning, design, development and deployment of your applications to take advantage of the benefits of cloud-native patterns and practices. We've invested in top-notch tools and practices to modernize your apps efficiently, all while keeping costs in check. The cherry on top? Our design and envisioning workshops, where your team gets to actively shape the outcomes for success.

Powerful Modernization Benefits

Enhanced Performance and Functionality

Your organization can harness the full potential of the latest technologies and frameworks. Migrating legacy applications to modern platforms significantly improves performance, enhances security and boosts functionality. Embrace cloud computing, microservices architecture and containerization for scalable operations and reduced costs.

Faster Time-to-Market and Customer Satisfaction

Continuous delivery and real-time customer feedback ensure your applications align with evolving user needs. Faster cycles, automated testing, and CI/CD practices get you to market swiftly, exceeding expectations and boosting satisfaction rates.

Innovation and Agility

Unlock the potential of your apps by integrating emerging technologies like AI, ML, and IoT through app modernization. Foster innovation and develop data-driven applications that set you apart from the competition. With cross-functional collaboration and rapid issue resolution, your organization will stay agile in response to market demands.

Competitive Advantage

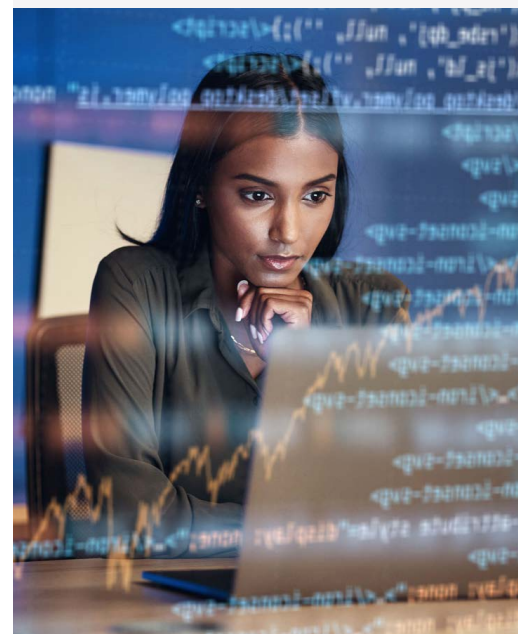

Empower your business to remain competitive by delivering high-quality, innovative applications that resonate with users. Embracing modernization is key to securing a competitive edge and thriving in the digital realm.

Why Choose CDW Digital Velocity

Digital Velocity is the most technical solutions integrator in the industry. With hundreds of expert engineers and a full-stack software development practice, Digital Velocity is your technical services partner when results and velocity matter.

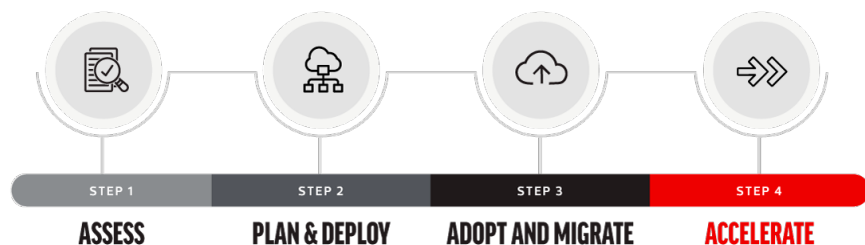

We prioritize building solid partnerships with our customers, listening to their needs, and delivering exceptional value and service.

To learn more, contact your account manager or call 800-800-4239.

Moving Through the Azure Application Modernization Journey

CDW provides you with the expert guidance necessary to assess, design, develop, and deploy your cloud-native applications. You can also leverage our follow-on services to accelerate your modern technology adoption strategy to garner further business benefits and competitive advantages.

PHASE 1

Application Modernization Assessment

The first step begins with the Application Modernization Assessment (AMA), where data is gathered to make informed decisions about your mission-critical workloads. We'll provide customized outputs like Cloud Readiness, Application Quality/Security, Supportability, Dependency Mapping, and Prioritization scores. Our experts use proprietary tooling and discovery sessions to create a roadmap for modernization that aligns with your business goals.

PHASE 2

Application Modernization Workshop

In the Application Modernization Workshop our goal is to provide a prescriptive design and architectural planning. We'll engage our development teams to ensure the work aligns with your business outcomes. You and your team will actively participate, maximizing value in the design and envisioning process. You'll see firsthand how this approach boosts your success and ensures you fully benefit from your investments.

PHASE 3

Develop and Deploy

Welcome to the development phase, where digital magic happens! With collaborative outputs in hand, we kickstart agile development. Our teams work closely with yours, delivering a high-end, well-architected, scalable result. We'll assist you in deploying modernized application into your production environment, handing off management and documentation to you. hassle-free.

PHASE 4

Accelerate Modern Technology Adoption

Explore more after deploying your modernized app with Digital Velocity's follow-on services. From Infrastructure Automation and Additional App Development to Cloud Governance, Data & Analytics Modernization, Cloud Security Deployments, AI & ML Engagements, and Modern Managed Services—we've got you covered.
