

## Innova's Cloud-Native Innovation & Modernization Offering

Accelerating App Innovation & Modernization with Cloud-Native Services on Microsoft Cloud

Cloud-native services are the key to unlocking the full potential of app innovation and modernization for enterprises. Enterprises can leverage cloud-native services to build, deploy, and manage applications that are scalable, resilient, and adaptable to changing business demands. In addition, cloud-native services also offer enterprises the much-needed flexibility to choose the best tools and platforms for app development and delivery. By leveraging cloud-native services, enterprises can accelerate their app innovation and modernization journey, reduce costs and risks, and gain a competitive edge in the market.

Enterprises encounter the below challenges while accelerating app innovation and modernization on cloud:

- **Ensuring security and compliance** across different cloud platforms and environments
- **Managing the complexity and cost** of migrating legacy applications and data to the cloud
- **Balancing the trade-offs** between speed, quality, and scalability of app development and delivery
- **Leveraging the best practices and tools** for cloud-native architectures and DevOps methodologies
- **Integrating and orchestrating data and services** across hybrid and multi-cloud ecosystems

Innova provides enterprises with a comprehensive App Innovation service offering that helps them overcome these challenges and accelerate their app transformation journey on the cloud. Our offering leverages the latest technologies, methodologies, and best practices to deliver high-quality, scalable, and secure cloud-native applications that drive business value and differentiation.

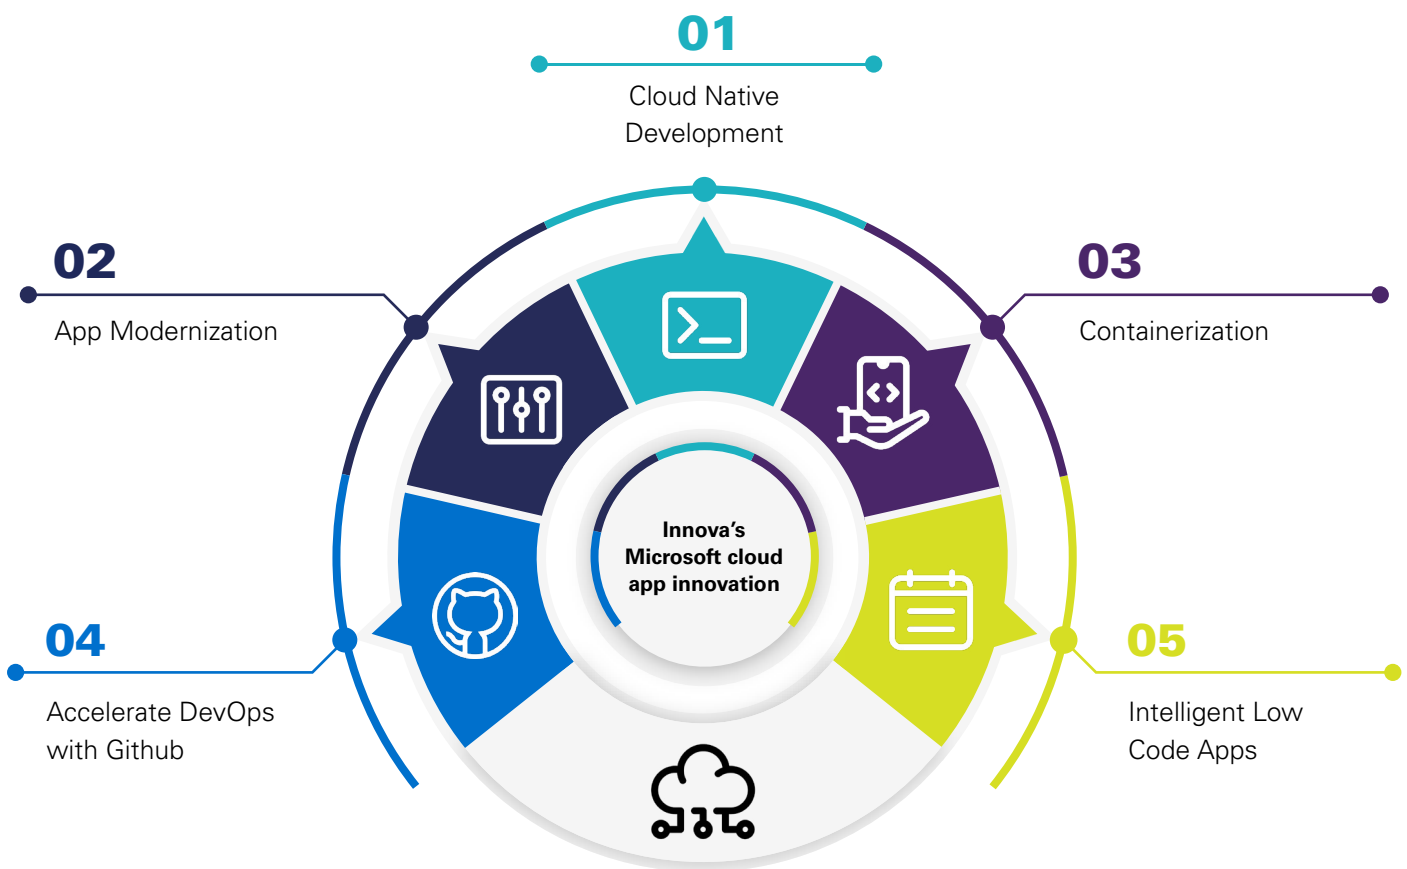

### Microsoft Cloud App

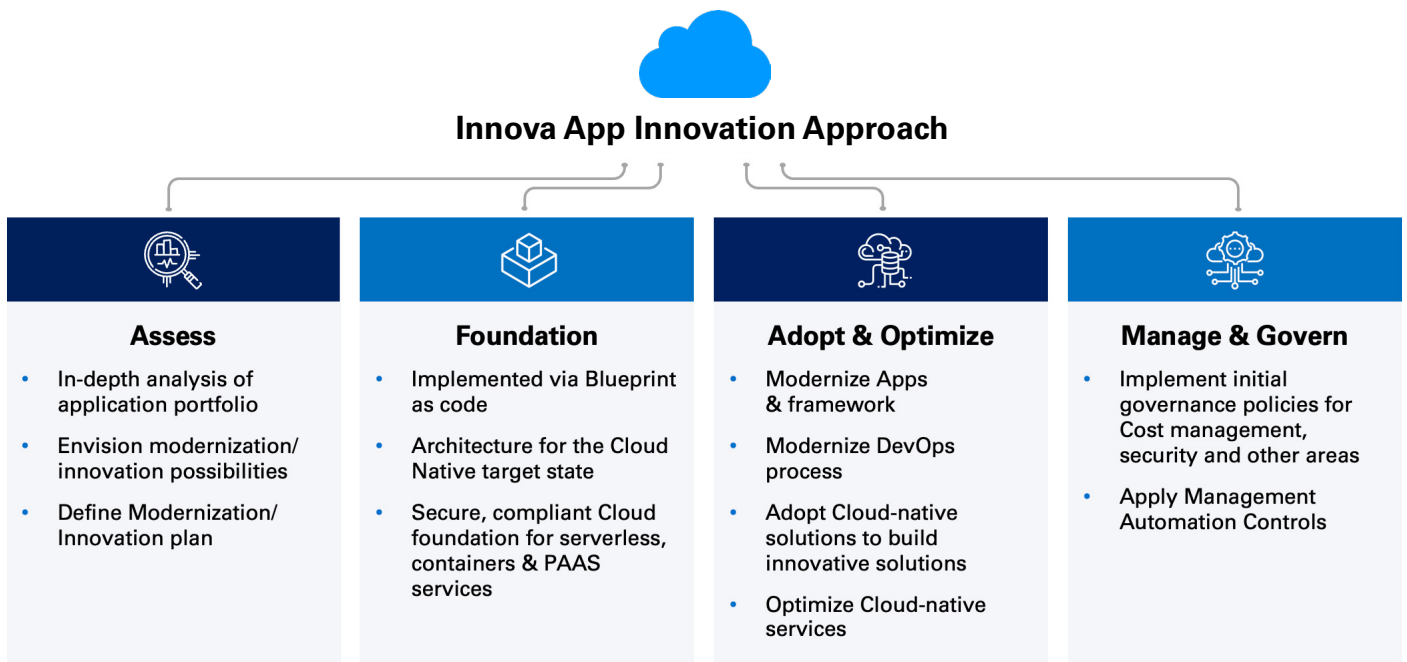

## Why are Clients choosing Innova?

Innova's App Innovation Offering is an end-to-end solution designed to securely build, deploy, and manage your applications utilizing Microsoft Cloud best practices and cloud-native architecture. Innova Solutions aims to help enterprises in their cloud migration journey by leveraging Microsoft Cloud offerings and providing comprehensive solutions for cloud-native app development and app modernization.

- **15-30%** reduction in time-to-market
- **40% faster app development** and deployment on a secure cloud-native infrastructure
- **Prioritized legacy app portfolio** with identified modernization opportunities
- **Accelerated cloud readiness** and Cloud-Native adoption
- **Insights into the real business** value of app modernization
- Deliver **AI-enabled developer** experiences
- **Faster assessment** and discovery
- Established **modernization patterns**
- **Standardized processes** that ensure security compliance
- **App deployment** follows the pattern at scale
- **Better cloud security** posture management

# Levers to Accelerate App Modernization & Innovation

Innova's Cloud App Innovation Offering is a comprehensive solution that helps organizations design, develop, and deploy cloud-native applications that leverage the latest technologies and best practices.

The Offering consists of four phases: Assess, Foundation, Adapt, and Govern.

- Assess:** Innova thoroughly examines the current state of the organization's applications, infrastructure, processes, and culture and identifies the gaps and opportunities for improvement.
- Foundation:** Innova helps an organization establish a cloud-native environment that includes all the necessary tools, frameworks, standards, and governance models.
- Adapt:** Innova facilitates the transformation of an organization's existing applications or develops new ones using agile methodologies, microservices architectures, DevOps practices, and cloud-native technologies.
- Govern:** Innova ensures that the organization maintains a high level of quality, security, and performance for its cloud applications, and provides ongoing support and guidance for continuous improvement.

## Recalling Our Success Stories

- Reduction of infrastructure maintenance costs** by 30–40% by switching to the Azure PaaS technology stack
- Enhanced scalability** via the use of next-generation technology stacks—AKS for microservices architecture
- DevOps Automation** helped enhance deployment efficiency and reduce costs.
