A CLOUD GURU

What sets A Cloud Guru courses and labs apart?

We started A Cloud Guru because cloud-specific learning was boring, outdated, and a pain to consume. We knew there was a better way. In five years, what began as a single course grew into **the most effective, hands-on, and comprehensive skills development platform for cloud learning.** *How?* Our dedicated team of in-house cloud experts. They go to ridiculous lengths to create fresh content backed by proven adult learning techniques and paired with advanced, hands-on lab technology in real, safe cloud environments. Today, A Cloud Guru helps more than two million people and thousands of organizations stay ahead of the technology curve.

Largest Multi-Cloud Learning Library in the World

100+
Certifications

250+
Courses

1500+
Hands-On Labs

450+
Quizzes and Certification Practice Exams

Learn across major cloud providers or by the specific skills needed to level up.

By Platform

AWS   Azure   GCP   Kubernetes   Linux

By Specialty

Security, DevOps, Big Data, Machine Learning, Containers, Programming, and more

There's a reason our content has 95% satisfaction from over 50,000 monthly ratings

Comprehensive Coverage

Because 85% of organizations are multi-cloud, we hear and support those diverse needs. Our curriculum offers hundreds of courses, and thousands of labs across all major cloud providers: Amazon Web Services, Microsoft Azure, Google Cloud Platform, and more.

Fresh Material

As needs transform, our dedicated content team continually updates courses, labs, and Learning Paths to keep your team on the cutting edge of modern technology. Because if we're going to be spending an entire course together, we believe it should be an engaging, topical investment.

Effective Approach

85% of our learners report hands-on learning improves retention. Our learn-by-doing method takes visual and audio lessons a step further by building practical solutions in live sandbox environments.

Tailored Learning Experience

Every learner, from beginner to advanced, will find courses that meet their specific stage of learning. From Certification Accelerator programs to in-depth Career Learning Paths, learners quickly progress through fun and captivating lessons while achieving role-specific goals.

We cut the learning curve and accelerate your skills development,
so you can find and empower your very own cloud gurus.
