VISIONET

Cloud Cost Optimization Services

The modern-day cloud complexities
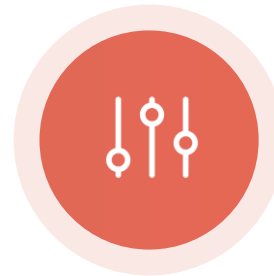

Increased Costs

Single Point of Failure (SPOF)

Cloud Management Complexities

Immutable Controls

VISIONET

How we Help

Assess

- Catalog the Cloud IaaS and PaaS resources that have been provisioned.
- Understand the trends of implementation and resource use over time.

Recommend

- Analyze the data and make recommendations with specific measures for lowering the cost of Cloud resource utilization.

Implement

- Prepare the implementation action plan in collaboration with the customer.
- To save finances and put the ideas into action.

Manage

- Using templated dashboards to enable monitoring and regular evaluation of cloud resource utilization.
  - An ITLT dashboard to evaluate consumption patterns
  - Dashboards at the domain, department, and cost center levels
  - A dashboard for each application
  - Report on application-level recommendations

VISIONET

Deliverables

Identify gaps in infrastructure

Optimize Memory and Disc Utilization

Improve Azure buying strategy

Tailored methodologies for lowering transfer costs

Potential cost reductions by switching to consolidated billing

Free cost-optimization assessment.

Track your cloud spending and your IT budget

Better understand your current Azure infrastructure
