

Elevate and Modernize Your App with Microsoft Azure at Speridian Technologies

Modernizing apps is crucial for businesses to stay competitive in today's dynamic digital landscape. A recent Forrester study found that there was 228% ROI when modernizing applications with Microsoft Azure. However, constantly evolving cloud services and cost structures makes it difficult to know where to start. At Speridian Technologies, we can help you define a tangible modernization framework that will not only help you identify which of your current applications can benefit from modernization, but specific areas to help you determine “go/no go” investment decisions like:

Our Approach

01 Discovery & Assessment

- Assess current app landscape, infrastructure, and business needs.
- Pinpoint ideal apps for modernization.
- Set objectives with stakeholders.

03 Environment Setup

- Establish a dedicated Azure environment mirroring your production setup.
- Integrate testing, monitoring, and top-tier security.

05 Implementation

- Refactor apps with Azure microservices for better scalability.
- Adopt DevOps for seamless integration, deployment, and testing.
- Enhance and validate security. Test performance under diverse loads.

07 Post-PoC Goals

- Collaboratively chart future steps, expanding modernization across your application spectrum.

02 Design & Planning

- Custom modernization blueprint addressing architecture and cloud-readiness.

- Choose Azure technologies and tools, with a focus on DevOps.

- Define a cost-efficient roadmap with milestones and deliverables.

04 Validation

- Ensure integration with current systems.
- Evaluate cost efficiencies and performance upgrades.

- Measure ROI and TCO. Gather and address user feedback.

06 Knowledge Transfer

- Handover sessions to your IT teams.
- Detailed review of the PoC outcomes.

Proposed Deliverables

Scope

Modernize up to 5 applications using Azure.

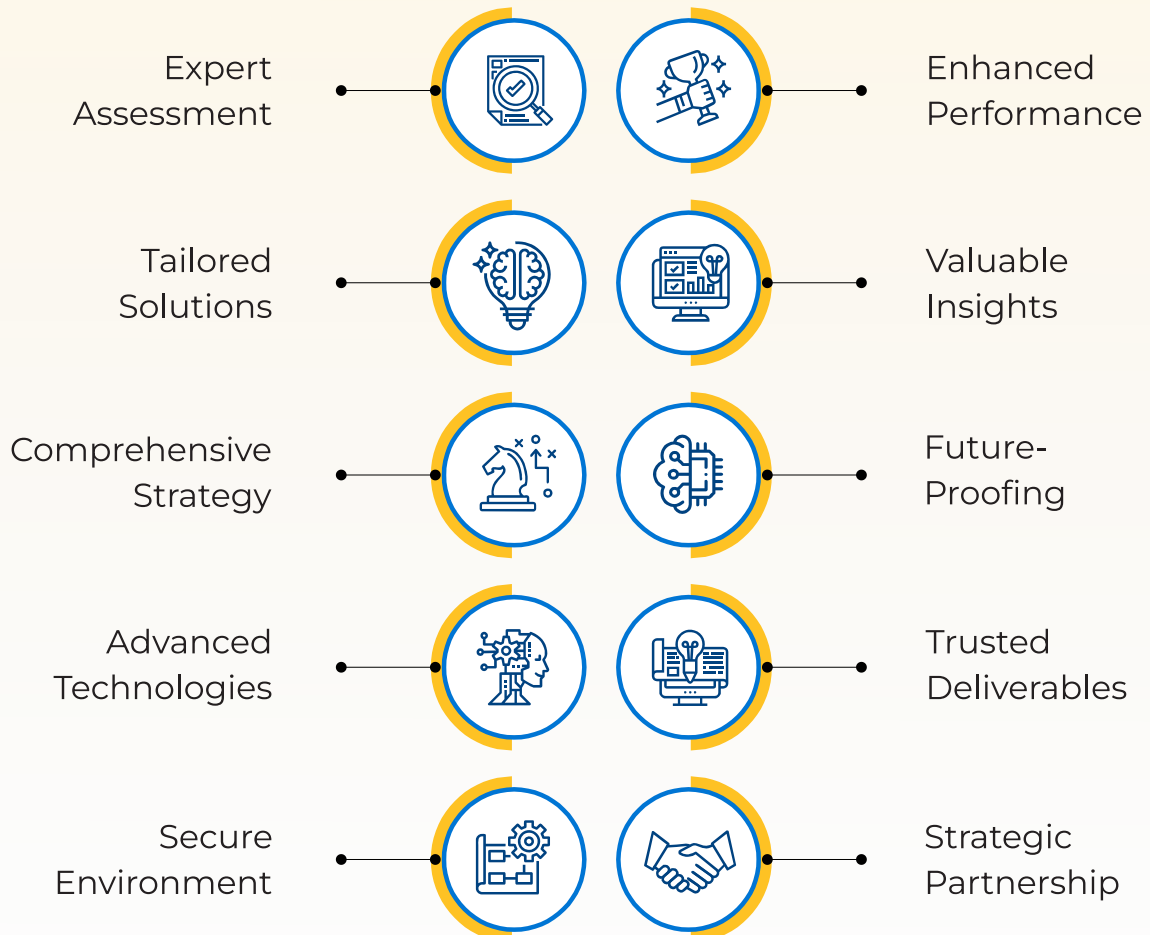

Framework

Business, functional and technical outcomes guide for future modernization efforts.

Documentation

Architectural diagrams and maintenance runbooks for upgraded applications.

We will help you create an Application Modernization blueprint for success!

Business focus.
Technology-fueled innovation.
Delivery excellence.
