

# Introducing Brillio's Open Banking Solution

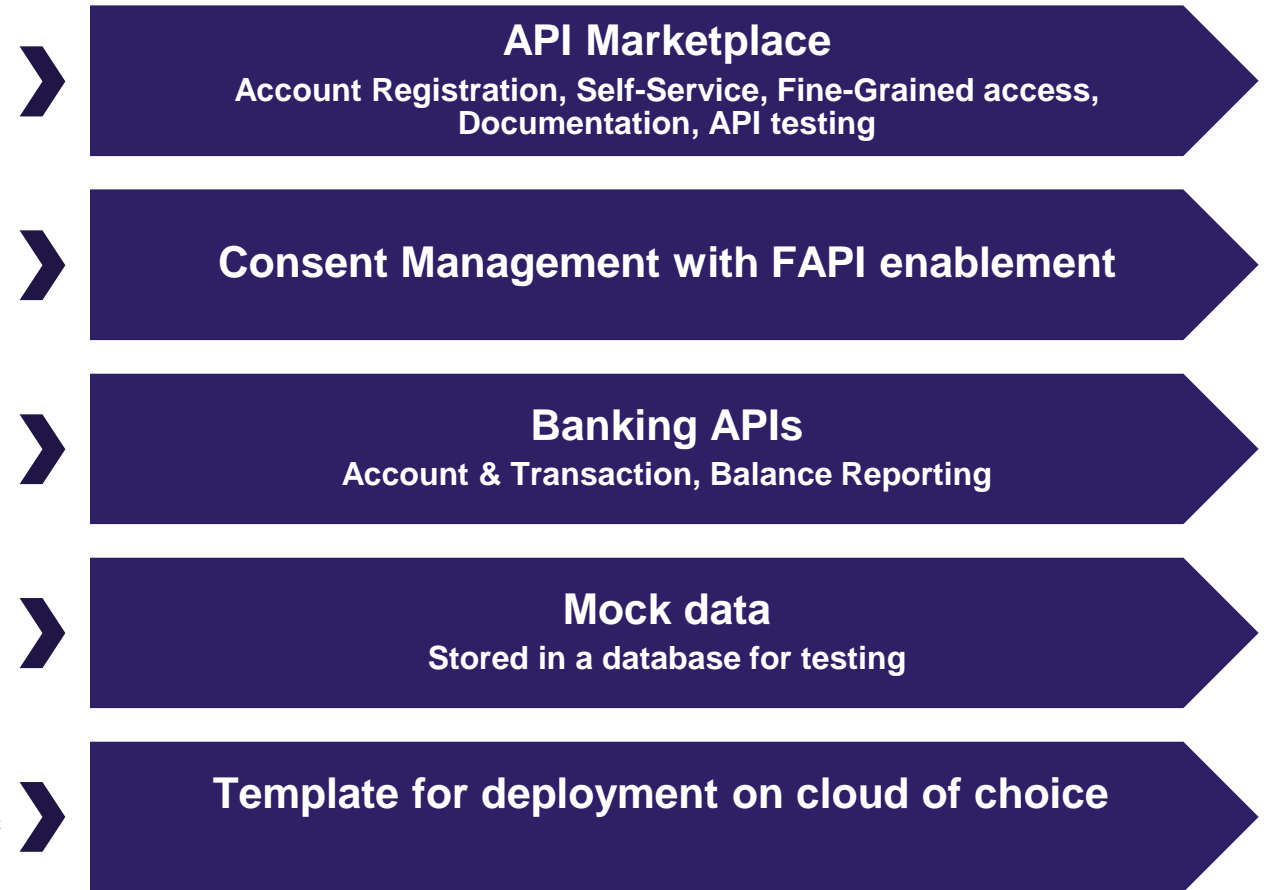

Through this solution, we aim to help the banks to:

Offer high-security APIs by implementing FAPI (Financial-Grade API)

Publish banking services APIs in an enterprise level API Market place

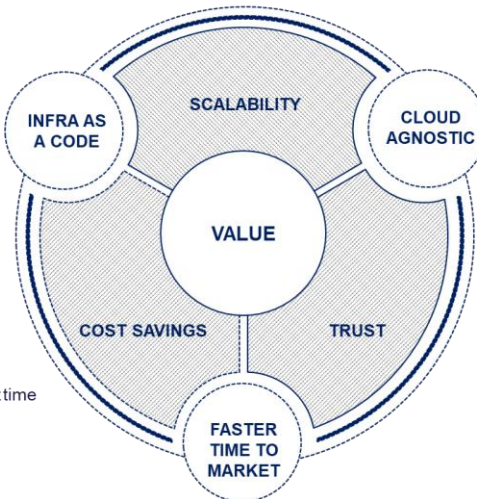

Implement a consent management solution to maintain client consent for sharing their data

The solution is empowered by open cloud-native architecture. The major components of the solution are:

## EASILY CUSTOMIZABLE

- Contentful headless CMS for content management

## FASTER TO DEPLOY

- Templatized architecture

## QUICK TO MARKET

- Save 3-5 months of development time

## OPEN-SOURCE CLOUD AGNOSTIC ARCHITECTURE

- Easy to adopt

## ENTERPRISE LEVEL CONSENT MANAGEMENT

- Leverages solutions like RedHat Keycloak, that supports user federation from any identity provider

Win themes and differentiators

Value addition for Banks and FIs

Additional revenue stream through monetizing the banking services APIs (Value added services, Embedded banking, Open finance)

Meet security and regulatory requirements like Open Banking and SR 21-14 Authentication and Access to Financial Institution Services and Systems
