

# Simplify Provider Data and Contract Management for Payers

- Are you concerned about data migration especially if your current data is flat?
- Do you spend more than 10 minutes on an initial Provider load?
- Do you spend over 10-15 minutes updating or terminating Providers?
- Do you store your contracts in a solution that allows easy re-use and manages the workflow?

## Current State of Provider Data and Contract Management

Provider data is complex, with multiple systems to manage

Many data quality issues, including manual errors from re-keying data

Data migration to a new solution is daunting

Contracts are static documents and may not be centralized

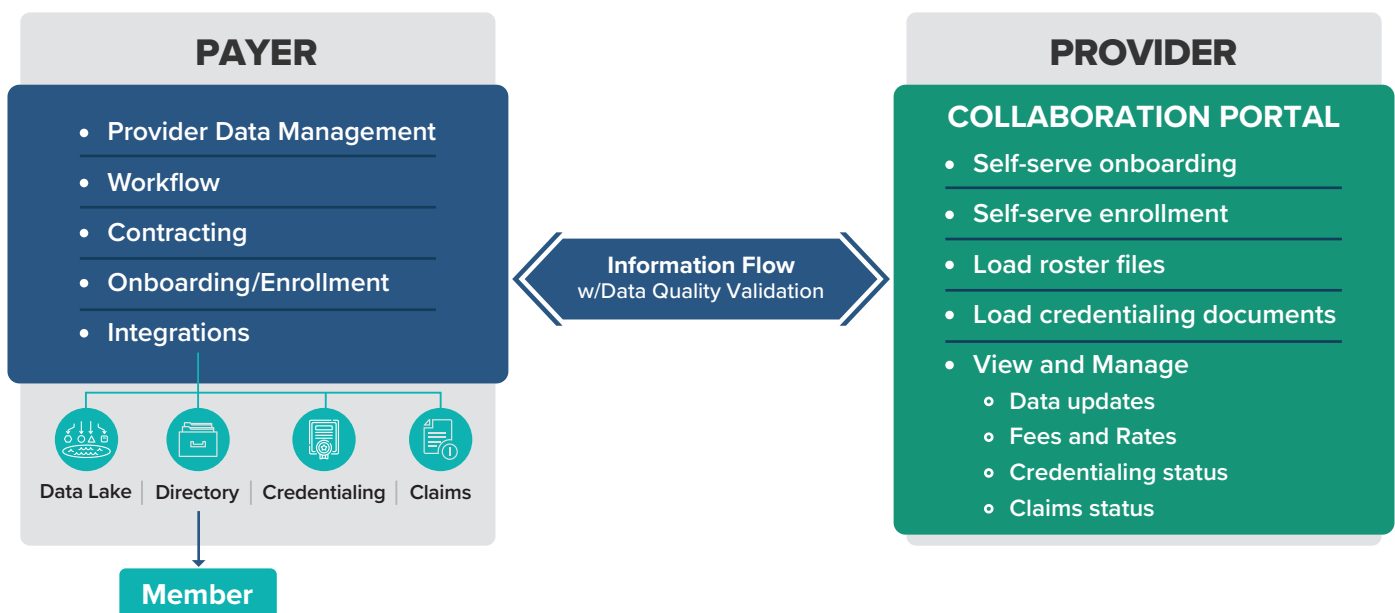

Contract version control problems happen with email

Providers are frustrated with the lack of transparency

## Our Solution

Provider1™ is a scalable solution that can solve your Provider data and/or contracting needs. By delivering an elegant user experience and automating data and contract management, a Payer can streamline workflow while improving data quality and enabling downstream integration. Providers can self-serve, improving engagement and transparency.

# Provider Data and Contract Management Capabilities

- **Reliable and portable Payer-specific master record**  
Provider1<sup>TM</sup> creates a reliable and portable Payer-specific master record.
- **Flexible data structure and hierarchy**  
Provider1<sup>TM</sup> allows Payers to work with data structures and hierarchies that fit their needs.
- **User workflow and process automation**  
It automates user workflows, processes, and contracts.
- **Business rules configuration for setup and data ingestion**  
Provider1<sup>TM</sup> ingests data based on business rules and connects disparate provider data applications and sources.
- **Manage contracts and the contracting process**  
Store contract templates, reuse language, manage redlines and notes, execute and store.
- **Keep contracts and data aligned**  
Provider1<sup>TM</sup> manages contracts and keeps key contract attributes (i.e., fees and rates) aligned with the provider data.
- **Establish and maintain high-quality data**  
Clean up data as it is migrated to Provider1<sup>TM</sup>, where business rules and 3rd party data can establish and maintain data accuracy.
- **Import multiple data sources with IntelliMatch<sup>TM</sup>**  
The rules-based engine enables the automation of multiple sources for appropriate updates.
- **Integrations and reporting made easy**  
Integrate via API or file extracts from the relational DataMart + reporting and analytics.
- **Productivity Functions**  
E.g., a change at an institution or location level can automatically be applied to every associated provider.
- **Scalable**  
Use as much or as little of Provider1<sup>TM</sup> as needed; it can serve as an end-to-end solution or fill in gaps around key point solutions allowing you to preserve those investments.

# Collaboration Portal/Portlets Capabilities

- **Invitations to join**  
Invitations open directly in the Collaboration Portal, enabling groups to begin onboarding.
- **Onboard and enroll Groups**  
Onboarding Groups, facilities, and other entities in the portal, then enroll practitioners directly with self-serve functions via roster files or singly with SmartEnroll<sup>TM</sup> data prefill.
- **Standard and non-standard contracting**  
Negotiate, review, and sign non-standard contracts; review and sign standard contracts.
- **Load credentialing information**  
Directly load any file required for the credentialing process.
- **Load roster files**  
Regular roster file uploads are drag 'n drop or automated via the portal.
- **Update new information directly**  
Directly update new information at organization, practitioner, and location levels.
- **View contract information**  
View contract terms, fees and rates to ensure transparency in reimbursements.
- **View credentialing information**  
View credentialing activity and results to ensure transparency.
- **APIs/Links to view Directory and Claim information**  
View a directory and claims reimbursement information to ensure transparency.

## Power a connected provider journey with integrations

Extend the capabilities of Provider1™.PDM and Provider1™.Contract with a host of integrations to achieve end-to-end lifecycle management of your provider networks

### .IntegrationHub

Use APIs and events to communicate data in a model that is easily consumable by target systems

### .DataServices

Enable OOTB and custom reporting, ad-hoc querying, analytics layer (e.g., Power BI), and file extracts

### .SuperUser.Studios

Empower superusers to maintain design rules and workflow configurations while also establishing governance

### .IntelliMatch

Enable multiple inputs into Provider1™.PDM governed by rules at an attribute level

### .SelfServe

Enable providers to load roster files, update facility, and location information, redline and sign contracts, and more

### .Service1™

Deliver accurate and complete answers to providers for benefit inquiries and extend the single consistent benefits inquiry platform to provider portals

### .Claims1™

Enable automated provider configuration, automated reimbursement configuration, and automated claims testing

### .Experience1™

Power your digital front door with rich, automated, and intelligent provider content

## Customers Testimonials

Provider1™ has delivered significant efficiency improvements for onboarding and managing providers, and the users love it! Did I mention that the Simplify Healthcare team has been a delight to work with?

– Senior Director, Provider Services

We are so happy with our decision to select Provider1™. We got the solution implemented in 6 months and it's made our lives so much better. We have automated how we manage data and contracts for nearly every provider in the state.

– Director, Network Management
