Advantco Azure Adapter for SAP NetWeaver CPI

ADVANTCO

The Advantco Azure Adapter integrates SAP CPI with Microsoft Azure across business environments to provide a seamlessly quick implementation effort.

SAP

Benefits of the Advantco Azure Adapter:

Low Maintenance — The Azure adapter is fully maintained by Advantco for all changes on Azure and SCPI

Quick and Easy Installation — Out-Of-The-Box integration across SAP and Azure business environments
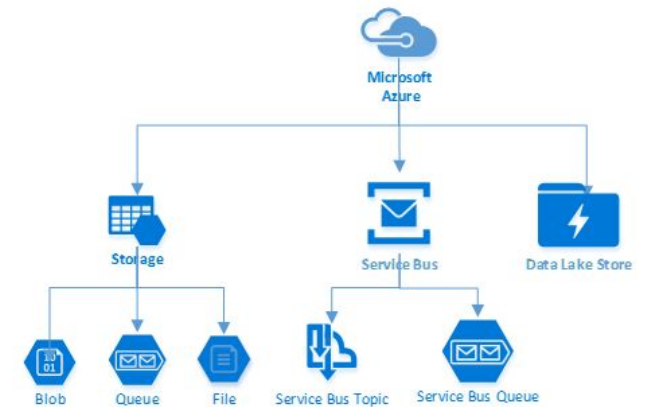

Saves Time and Money — Developing your own integration solutions is costly, time-consuming and inefficient

Full integration with SAP NetWeaver and the following services:

- ➔ Blob Storage
- ➔ Queue Storage
- ➔ File Storage
- ➔ Service Bus Queue
- ➔ Service Bus Topic
- ➔ Data Lake Store

Key Features:

- ➔ Easy connections via specific container using AZURE credential (Connection String or Define Explicit)
- ➔ Content conversion between Plain, JSON and XML Formats
- ➔ Duplicate Handling to prevent adapter from processing same resource entities again
- ➔ Adapter-Specific Message Attributes (ASMAs) configuration for creating dynamic configurations in PI message header
- ➔ Retry Failed Block Operation to handle failed block during upload to Microsoft Azure

Use Cases

Integrating SAP with Azure Messaging via Service Bus

- ➔ Leader in online retail used Advantco Azure Adapter to integrate SAP CPI with Azure Service Bus to push changes to Azure Cloud

- ➔ Broadcasting Corporation used Advantco Azure Adapter to integrate SAP CPI with Azure Cloud environments to support compatibility with Apache Karaf Runtime and connectivity with Azure Service Bus Topic
