BEYOND THE BASICS

Modern Endpoint Management

How does a threat actor view your business? As a collection of people, devices, and applications to exploit. And with each area of business growth, threat actors see more people, devices and application to take advantage of. Expansion of your revenue also equals a broader attack surface.

So how should security teams keep pace with business growth?

There's a reason Microsoft chose us as their Modern Endpoint Management Partner of the Year for 2023. We believe you can reduce your threat risk by modernizing your Endpoint Management Strategy.

Our Modern Endpoint session will cover:

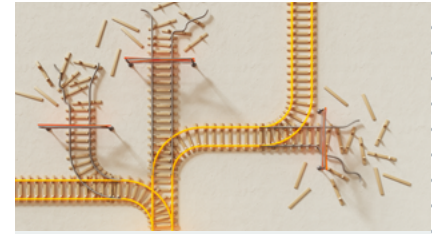

- The difference between Endpoint Management and Modern Endpoint Management
- How Modern Endpoint Management lowers your total cost of technology ownership (TCO)
- Why incorporating cyber threat intelligence is critical to Modern Endpoint Management

In this session you will learn:

 <p>The benefits of upgrading and replacing legacy technology</p>	 <p>How to leverage cyber threat intelligence to bolster endpoint strategy</p>
 <p>How to increase operational efficiency</p>	 <p>The benefits of cross-team communication</p>

ABOUT ASCENT

Ascent is the tech-enabled cybersecurity services partner to solve the most challenging problems. The firm is built to evolve cybersecurity posture, modernize Microsoft solutions, and manage entire security ecosystems. Ascent's consulting excellence and threat-informed Cy:lent software suite provides organizations with the Modern SecOps core needed to accelerate a safer tomorrow.
