

إنتاجي

Intajy makes it easy for organizations to give online video training. Using cutting edge technology, that is as easy to use as Facebook and LinkedIn, Intajy helps you launch a sophisticated online training program without hiring a single Engineer to run the show.

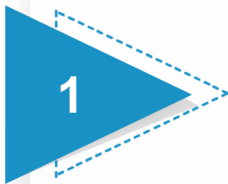

Using our Whitelabeled website launcher, companies have gotten up in running within hours using their training content in Arabic, English, and Urdu.

Our cloud based or on premise solutions mean you can train a couple of hundred, or hundreds of thousands of users with the same level of efficiency, without the need for a single Engineer.

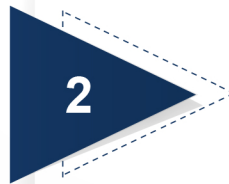

Benefits:

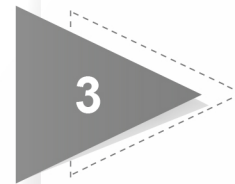

Intajy LMS is committed to providing E-Learning solutions and services to help deliver and manage corporate training, bringing various benefits:

Boosted Return on Investment

Reduced Total Cost of Ownership

In-house installation of user-friendly LMS solutions

Features:

01

Arabic Users First

From day one, the Learning Management System and Marketplace of Intajy LMS is focused on providing the best possible learning experience for Arabic speaking professionals across the MENA region.

06

Cutting-Edge Experience

Intajy LMS provides a user-friendly interface that helps end-users focus on the most important tasks at hand using advanced technologies like HTML5/CSS3/Javascript.

02

End-User Management

Beyond direct user management in departments, organizations can fully customize the structure, and provide access to courses based on their internal user requirements.

07

Course Management

Using keywords, courses can be found easily by users as they are categorized according to various specializations.

03

Course Authoring

Since Intajy LMS was built for both the instructor and enterprise, it offers unlimited course creation capabilities for organizations using its cutting-edge course authoring tool.

08

Testing & Tracking

With its advance 4-type question engine, Intajy LMS allows organizations to fully control the way exams and quizzes verify the knowledge gained by learners.

04

Reporting

Reports designed to identify learner's progress can be simply generated through the system. This helps administrators and HR personnel identify usage patterns and benefits at any time.

09

Certificates

Since rewards are an important part of any learning experience, certificates are created to help an organization provide every learner with proof of completion to share with peers and colleagues.

05

Useful Mobile Access

With an increase in mobile communications in the Middle East region, Intajy LMS is designed for mobile access to make user experience truly pleasant and smooth.

10

Courses & Content

With the expanding Arabic online training industry, Intajy LMS has positioned itself as one of the leading providers of the best Arabic video-based training in the world.
