

SMX Accelerate

Email security & compliance for Office 365 users in Australasia

SMX Accelerate is a next-generation email security, archiving and analytics platform. It offers unrivalled reliability, user-friendliness and powerful features to make email management more secure, efficient and scalable.

- Layered security for global and local threats
- Designed for compliance, a true archive with full audit trail
- Legacy archive migration, taking away the pain of moving email records into the cloud
- Seamless integration of Email Security and Archiving for Office 365

Recover any email

Easily recover any email regardless of age, source or destination from our powerful Azure email data store.

Answer the critical questions

When you need answers about email compliance, risk of attack, most vulnerable users and message flow, SMX Accelerate will provide you with evidence-based reporting.

You're in control

Make changes and manage email configuration without the need to call on external specialists.

Peace of mind

You get the protection of multiple world class email filtering systems to protect your people and organisation from those who continue to test your security.

Hassle free

Simple and easy solution to migrate your legacy data.

Archiving

Secure, scalable, reliable - provisioned on Microsoft Azure

Security

Detect and protect against sophisticated threats

Management

Manage your users, rules and data in one place

Analytics

Access and analyse powerful reports in minutes

“

I would absolutely recommend SMX to other businesses. It's a powerful tool, and easy to manage. And we don't have to invest a lot of time or resources to manage it – it pretty much looks after itself. It just works.

Email Protection & Archiving, Made Easy

SMX Accelerate is different than others

- You are not tied into costs of managing aging onsite technologies
- You'll have full jurisdictional control of your data
- You'll get multiple anti-abuse engines with configurable rules
- Archiving on Azure, high availability, scalability and cost effective
- Security systems that specifically target the Australasian threat landscape
- SMX migration tools and services simplify legacy archive migration
- We are accessible – we have skilled, local staff on hand when you need them.
