

Let DynaTech Optimize Your Invoice Processing

Automate your Invoice Capturing with Microsoft Dynamics 365

Challenges

Invoice processing is a challenging ordeal where manual invoicing procedures tend to be expensive, labor-intensive, and vulnerable to human inaccuracies. Businesses often struggle with obtaining a precise understanding of the invoice status.

This lack of clarity could potentially result in financial penalties if payments are inadvertently overlooked. Inadequate management of invoices can impede the development of healthy relationships with both suppliers and customers. Numerous companies encounter these issues during the process of invoice capturing.

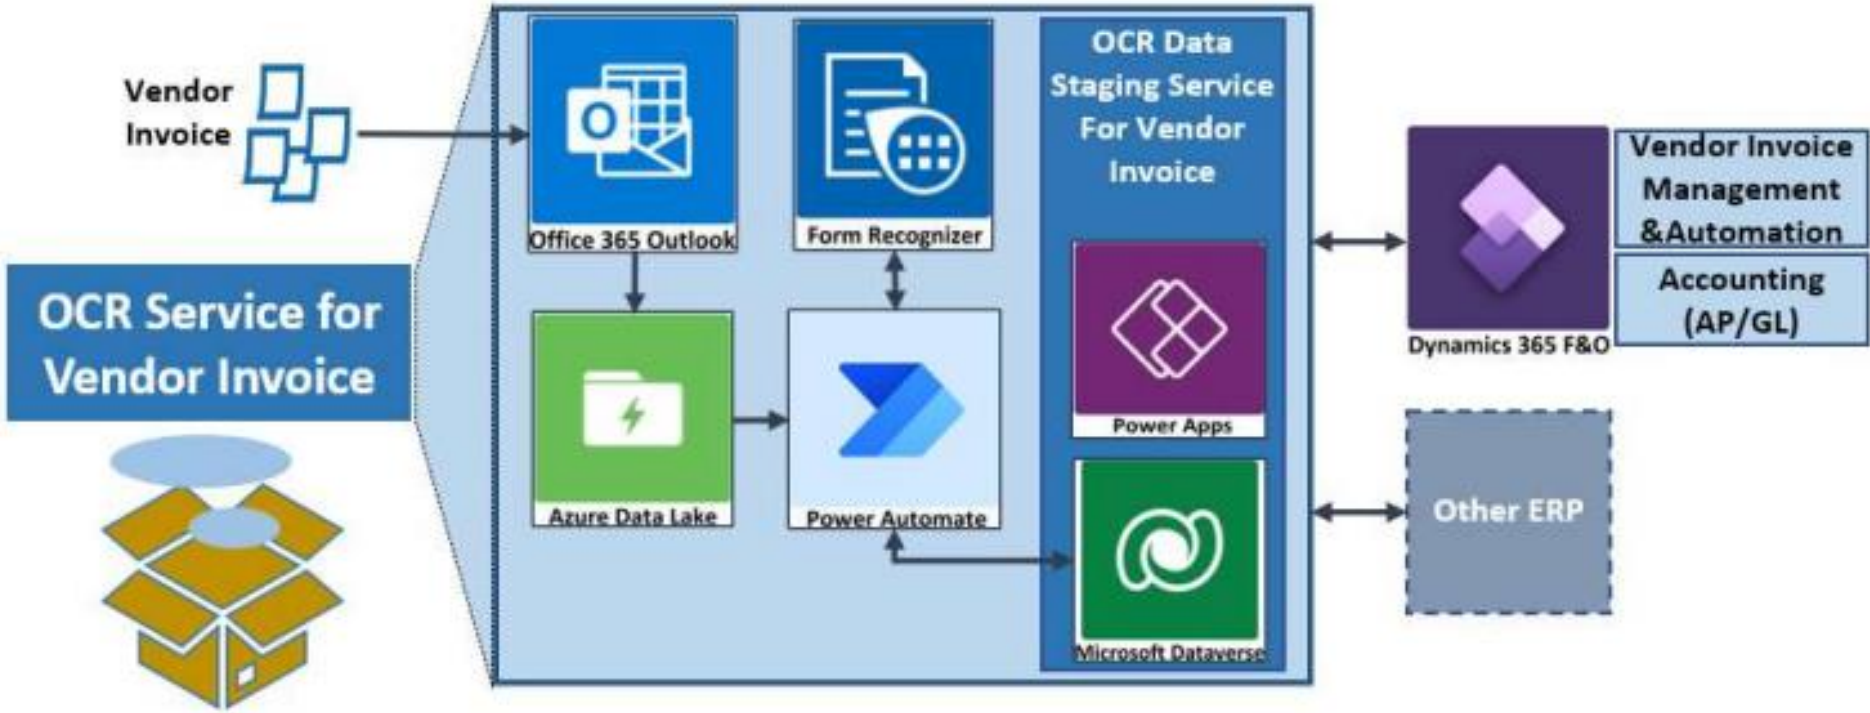

What do we offer?

DynaTech Systems' transformative approach dramatically slashes time expenditures, allowing IT departments to place their trust in an Invoice Capturing solution seamlessly integrated into the Dynamics 365 ecosystem.

We eradicate bottlenecks in the invoice processing pipeline so that businesses can nurture positive relationships with both suppliers and customers. The Invoice Capturing solution oversees the entire invoice lifecycle from the initial receipt and data capture to the intricate processes of matching, coding, routing, culminating in the eventual approvals.

Features & Benefits

Dynamics Integration

Bi-directional integration of Microsoft Dynamics 365 Finance and SCM and Microsoft Dynamics 365 Customer Service for accurate invoice details capture.

Process Automation

Automation of monotonous processes with higher accuracy.

OCR Vendor Rules

Creation of rules and actions for multiple vendors through OCR software for capturing significant information.

Cost & Paperwork

Less operational costs and paperwork.

Workflow Efficiency

Reduction of bottlenecks and delays in the approval process with automated workflows and routing.

Regulatory Compliance

Compliance with the regulatory committee and government regulations.
