

PREACT Project Insight

A complete Business Intelligence Solution
for Project-driven Companies

What is PREACT Project Insight?

PREACT Project Insight is an off-the-shelf data solution for *project driven companies* that assembles data from your main systems into user-friendly dashboards providing day-to-day decision support. The solution features:

- Daily updated dashboards with your hour production, capacity and finance KPI's
- Easy too use interface
- Build from Industry Best Practice
- KPI Drill-down
- One version of the numbers
- Desktop/Tablet/Mobile access
- Alerts and e-mail notifcations

To be able to keep improving the revenue driving KPI's you need an Insight Solution that **encourage action** and **accommodate the insight needs** of both management and employees

Insights on Your Projects, Customers & Employees

PREACT Project Insight gives you sophisticated insights to help your management & employees focus on the right things

Easy-to-use Interface

A seamless, **easy-to-use interface** lets your employees access relevant data and visualizations in just a few clicks, and setup **e-mail notifications** on their most urgent insight needs

One Set of Numbers

With a **state-of-the art datamodel**, you will not be spending time discussing which version of the numbers are correct. You will have just **one set of numbers**.

Desktop/Tablet/Mobile

Naturally, PREACT Project Insight is accessible from **all locations** and with your employees preferred devices (desktops, tablets and smartphones)

Excel Data Access

Certain employees will have the need to integrate the data into Excel, to work further with them. PREACT Project Insight has an **out-of-the box** integration between the **datamodel**, the **dashboards** and **Excel**.

Industry Best Practice

Build from years of Industry experience, the solution utilizes **Industry Standards** and **Best Practices** to keep you ahead of your competitors.

Drill Down Functionality

Drill down on specific measures to investigate the nature of each KPI and which **underlying drivers** that has had the highest impact on the KPI.

Configure & Customize

Personalize Your Solution

Flexibility to tailor your PRACT solution to meet the needs of your company

Configure

PRACT Project Insight will be configured to integrate seamlessly to your **existing systems** leveraging your time registrations, project information, finance, etc.

Fast Implementation

Where normal BI projects typically takes between 4-6 months, PRACT Project Insight will be **implemented in weeks**. This is due to the fact, that we know your line of business and has prepared both data model and dashboards in advance.

Customize

PRACT Project Insight can be customized to your needs. You get the flexibility to **define your own reports**, dashboard needs and visualizations.

Robust Technology

PRACT Project Insight is based on robust, market leading technologies from Microsoft. This means that reliability, security, e.g., is Best In Class.

We Know Your Business

The **PREACT Project Insight** solution is build from years of experience working with project driven companies. Hence, we know **how to measure** a business like yours, and **what data is crucial** for you to make your daily decisions.

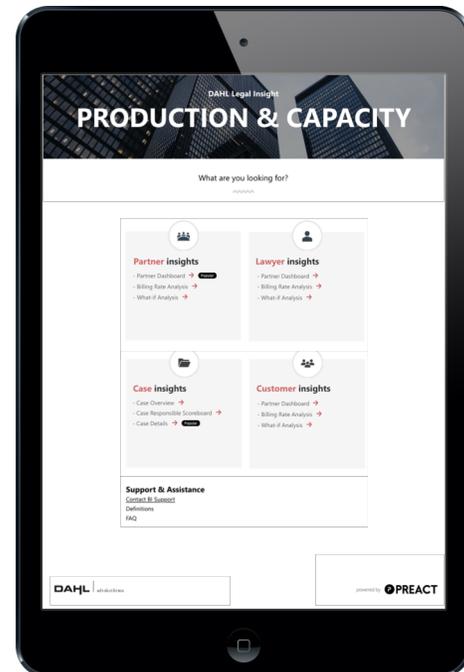

This gives you a range of advantages:

- Identify projects/customers/employees that needs attention
- React on KPI's in a timely manner, resulting in increased revenue or decreased costs
- Get a full working BI setup in weeks
- We bring the Best Practices from your industry to you to make sure that you are on top of the standards.
