10 REASONS
TO DEPLOY MS PROJECT ONLINE BY PPMFAST

Rapid Deployment

1

By using PPMfast the deployment of your Microsoft Project Online environment could take as little as 4-8 hours which means your teams can be up and running, and productive immediately.

Maximum ROI

2

With PPMfast you are able to maximize the results of project management without the need for a high up-front investment, requirements/needs analysis and methodology preparation.

Pre-Configured Reports and Analysis

3

PPMfast comes pre-configured with cockpits and dashboards, containing various measures that enable the effective management of portfolios, programs and projects. Among the measures: Key Performance Indicators, Cost, Progress Reports, Monitoring of Resources, their Assignments and Availability.

Seamless Integration

4

PPMfast provides seamless integration with Microsoft SharePoint and Microsoft Office applications, which enables you to have total control of project documents in a structured way, with indexed searches that speed up access to information.

Reduce Budget Overruns

5

Visibility into project performance, which allows for timely decision making and the ability to address issues as they arise, preventing project delays and associated budget overruns.*

Source: Forrester. "The Total Economic Impact of Microsoft Office 365 PPM." December, 2015.

Increase Productivity

6

"PMs were able to increase their project throughput by 14%" because Microsoft Project Online allowed them to be more efficient on a day-to-day basis.*

Improve Resource Management

7

"13% increase in resource productivity due to having better-aligned skillsets on projects, as well as 25 hours of project delay reductions due to resource unavailability". By aligning skillsets more effectively and providing the ability to manage resource pools, additional savings can be realized, not to mention gains in employee and worker satisfaction.*

Better Alignment of Strategic Priorities and Projects

8

"75% of survey respondents who were able to optimize their project portfolios saw better alignment of strategic priorities and projects" by using a Microsoft Project Online based solution.*

Mobility

9

With PPMfast Mobile your project team can easily access Microsoft Project Online data on a smartphone and improve their communication efficiency, delivering the best results for your organization.

Modern PMO

10

Work from anywhere, collaborate on any type of project in a secure environment, with full functionality.
