

# Craft amazing desktop user interfaces fast

Using custom control properties, Bunifu UI empowers software developers to easily create modern stunning user interfaces fast.

Bunifu Framework provides user friendly easy to use drag and drop functionality within your .NET development environment.

With already customized controls, Bunifu controls enables you to spend less time thinking about interface implementation saving you hours of development time.

## What is Bunifu Framework?

Bunifu UI Controls are DLL driven tools to help you build awesome desktop application interfaces. It guarantees great user experience in your apps and reduces development time.

The DLLs are installed in your .NET environment and is built on top of WinForms. It enables developers to drag and drop hence faster coding!

### Easy to use & Saves time

With drag and drop UI controls and documented custom properties not much coding is required hence saves time

### Improved team productivity

- 2x increased productivity
- Free up time and resources

### Faster development

Quickly achieve your desired look and feel with inbuilt custom user control properties.

### Ship faster

- Complete projects in time
- Stay within budgets

### Modern & Flexible

Easily achieve flat style, material, metro or classic look with inbuilt custom control properties.

### Great user experiences

- Appealing user interfaces
- Satisfied users and stakeholders

## Why customers use Bunifu Framework

Software developers love Bunifu Framework because it empowers them to:

- Ship their UI designs faster hence saving development time
- Design modern stunning user interfaces in less time
- Work optimally hence guaranteed performance due to light weight nature of Bunifu developer tools

“What we liked about Bunifu UI tools is the small footprint on the system while allowing great style and flexibility. The price was also just right. Their customer support is always fast and efficient”

- Ralph Arkas, CEO, Soraco Technologies
