

GazeSense™

3D Attention Data for Retail

Attention data is hard to collect

- Head mounted trackers, use of VR or surveys
- Time consuming setup
- Only one person is tracked at a time
- Focus group can be biased

GazeSense™ makes it easy

No Glasses

3D Gaze

Real-time API

Watch this [demo video](#) to see the GazeSense™ software identifying attention towards selected product groups.

Anonymous

Track thousands of people passing in front of shelves, with anonymized data that is GDPR-compliant.

Accurate

Accurately identify what product groups shoppers are looking at*. No calibration required.

Realistic

Get data in the physical store from real shoppers as they make on-the-spot purchase decisions.

GazeSense™

Software for 3D attention tracking that works with low-cost commercial hardware, such as Intel Realsense, Orbbec Astra or Microsoft Kinect.

Simple Setup

1. Position 3D camera
2. Connect camera to computer
3. Map your environment* in GazeSense™
4. Start streaming attention data

Sample hardware

*Map surfaces and 3D objects representing your retail environment in GazeSense™ through the API, label them and track attention towards them in real-time. Our customer support team will gladly assist you, if you need any help in this process.
