

Powerful and Super-Easy Learning Management System

FlowLMS is a cloud-based Learning Management System, that grows flexibly according to the training needs of your organization. Our eLearning environment scales to fit the needs of the small company just as well, as the demands of the large enterprise. FlowLMS is a mobile friendly learning environment yielding to various training needs and different eLearning activities. Thanks to its ample tailoring options, FlowLMS is able to meet the demands of any organization's digital learning.

Main features

Internal and external training needs. With FlowLMS you can train your own personnel, customers and partners. Courses are targeted for each group so that sensitive course information is not visible to others.

User-friendly reporting. FlowLMS can send reports automatically to required contacts, for example to business area managers as well as to local offices. Reports will contain only relevant information from each area.

Works in mobile. FlowLMS is designed and develop to be super-easy to use. User interface is simplified and works in desktops, pads as well as in mobile. Users do not need to have any previous experience in learning management systems.

Multilingual. FlowLMS provides fully localized user interface, available in 25 different languages. Courses can be localized to all required languages and delivered to the users based on their preferred language

Safely from the cloud. FlowLMS runs on global enterprise grade cloud datacenter. Cloud service meets a broad set of international and industry-specific compliance standards and will scale to meet all needs. Course information is fully backed-up and available whenever needed.

Grows with your needs. FlowLMS scales from local entry level version to global enterprise deployments. It is fully customizable and has open integration interface to meet your needs.
