Pros: AzureDesk is a software that highlights by its simplicity of use for.

After you register, you can start using the product with all its features for only a small fee per agent at month.

The support team is really helpful, they answer in just a few minutes, and they will give you a free Skype meeting to show you all the features deeply if you need it.

They have also Support for HTML signatures! A very interesting feature that no others helpdesk software have out there.

We are really happy with this product after several months of use, it has helped us to organize our support requests and give more control over them.

Very recommended for anyone needing a Customer Service and Helpdesk Ticket Software.

Cons: Nothing, I like all features of this product including: simplicity of use, small fee per agent at month.

Overall Features & Value for Money

Pros: We never knew the importance of IT help desk software until we got one, and got the right one. We chose Azure desk and it has never disappointed us.

Cons: We have education management software. we are solving our customer problems using azuredesk.co customer support software. My main problem was with my customer, it was impossible to keep track of their query, doubts & errors. Using Azure desk my problems are solved quickly.

Overall: AzureDesk.co has helped us improve our productivity and improve our customer satisfaction. We tried several other helpdesk systems but AzureDesk.co had the best features/price ratio and the support team is great!

AzureDesk.co is an end-to-end customer support engine for rapidly growing companies. The system contains a variety of reporting features that help administrators make key business solutions.

'Decent support tool for large companies'

Jun 18, 2018

AzureDesk

by AzureDesk

4.5 / 5 35 reviews

Source: Capterra

Pros: Azure Desk works pretty well for Users support. It offers live chats, tickets monitoring and auto-replies. The best part of the solution is how it is automated with JIRA and Slack, which saves you some time.

Cons: I think reporting module should be looked into. Besides, I wish export features were more consistent. Other than that the application is OK.

Customer Support

Value for Money

Likelihood to Recommend :

Pros: The support has been outstanding. Very open to suggestions for improvements, enhancements and changes. The interface is clean and mostly intuitive.

Cons: Like most software there is more under the hood than is first obvious. Understanding how to get the most out of it is worth investing the time. Once committed to there were some delightful benefits such as the showing the support centre as if it was the FAQ page for our website. This means we can keep it current and relevant right from within Azuredesk. That brings time leverage to our doorstep.

Overall: Streamlined process improvement, better tracking and easy audit trail.

and Services, 51-200 employees

Used the software for:
Less than 6 months
Source: Capterra

Comments: AzureDesk has impressed me from the first time I used it.

First of all, its simplicity of use makes you don't need any documentation or manual to learn how to use it.

After you register, you can start using the product with all its features for free (one agent), and then scale up based on your needs. It's really a gift!

The support team is really helpful, they answer in just a few minutes, and they will give you a free Skype meeting to show you all the features deeply if you need it.

We are really happy with this product after a week of use, it has helped to organize our support request internally and we are start using it to our customers also.

Very recommended for anyone needing a Customer Service and Helpdesk Ticket Software.

'Azuredesk - Suits our business, developers very receptive to our suggestions'

Mar 28, 2017

AzureDesk

by AzureDesk

4.5 / 5 35 reviews

Source: Capterra

Overall	Functionality	Value for Money
---------	---------------	-----------------

Pros: it gives me an easy method to view all cases. It helps our consultants solve cases quicker and helps us learn to better support of products and clients.

Cons: We would like more rules to allow things like automatic assignment of cases.

Overall: We were looking for an economical tool to help us with our support cases. Previously we just used a support email and found that we were duplicating our efforts to respond to cases. We now have visibility of the case, who is assigned, its history and our support team can look back and see solutions for previous and similar cases. We can also get an overview of cases by support person, customer, product etc.

Pros: A streamlined approach to support management with emphasis on team collaboration and educating clients for quick resolutions. Layout of tickets, Dashboards, Knowledge Base and Ticket search function stand out the most to us. AzureDesk is constantly on the improve with very quick response times from their team.

Cons: The main areas we are looking for improvement in is a quicker loading speed of tickets and better compatibility across mobile devices.
