

SiRFULL® | Welding Management Software

PREMIUM Edition 2018

WPS, PQR, WPQ | Welding documentation | Material tracking | Conformity | IoT

WWW.SIRFULL.COM

YOUR CHALLENGE

You produce welded assemblies such as: rotary machines, valves, tanks, pipes ...

During the manufacturing of those assets, you are prone to costly regulatory requirements which require meticulous and time-consuming follow-ups.

Your challenge is even more difficult in a competitive sector where the pressure on price and quality continues to increase...

In order to be more productive and stay competitive, you must ensure that each equipment produced is compliant, in phase with the clients' requirements, codes and standards.

DIGITALIZE YOUR PRODUCTION OF WELDED EQUIPMENTS

SiRFULL | Welding management® is your collaborative application available in the cloud: feasibility, process, resources, procurement, manufacturing, control and compliance.

The software SiRFULL | Welding management® is the digital solution dedicated to the optimization of your welded equipment production. A real conductor of your industrial performance, SiRFULL | Welding management® harmonizes all your production around your usual constraints of time, quality as well as the changing environment: regulatory constraints, demand and innovation.

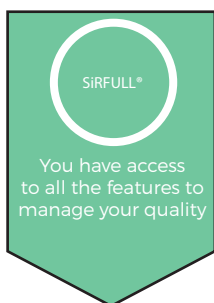

BENEFITS:

- Ensure 100% compliance in your production.
- Reduce by 50% the time dedicated to the creation of the technical documentation.
- Certify the traceability of your production.

FEATURES

Subscription in the CLOUD*

BI dashboard	✓
Business management	✓
Management of monitoring units	✓
Creation of equipment	✓
Management of WPS, PQR and permanent assemblies	✓
Management of welders or operators	✓
Renewal of welders or operators' qualifications	✓
Management of material certificates and welding consumables	✓
Management of the welding follow-ups and controls	✓
Management of the welding books	✓
Management of the manufacturers' records	✓
Locating welds on a map	✓
Management of non-destructive control and heat treatment	✓
Management and edition of quality documentation	✓
Library management	✓
Microsoft Office Interface, multilingual	✓
User support	✓

PREMIUM FEATURES*

SiRFULL | Welding management® PREMIUM edition 2018 offers you exclusive features:

- **SiRFULL Procedure:** Automated creation tool of the welding procedure.
- **Connected welding machine:** SiRFULL® can now connect to your compatible workstations and use the data (power, consumption...). Control your assemblies in real time and improve your operating mode.

SERVICES*

- Customized software settings and interfaces with other software (ERP, GPAO, GMAO)
- User training and assistance for change
- User support and computer maintenance
- Recovery of existing data

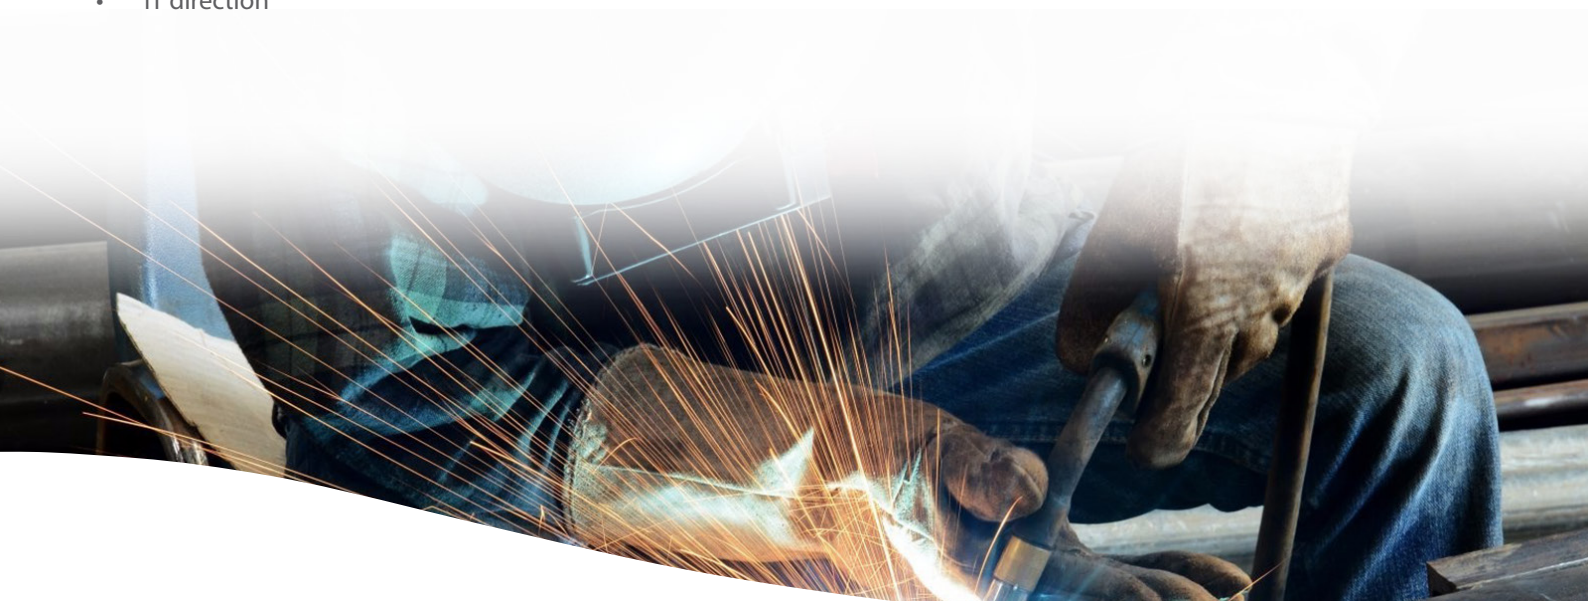

CLOUD

- In subscription mode (CLOUD), for turnkey solution via internet

*On demand

Users example

- Production manager
- Methods engineer
- Welding coordinator
- IT direction

CUSTOMER RESULTS

THEY TRUST US

Emerson Process, Cernay, France

Emerson Process builds control valves for the nuclear sector. «*The time-savings and the added value achieved by SiRFULL | Welding Management Software® are outstanding. In 2014, Emerson Process successfully underwent 14 audits. The certifying bodies have particularly appreciated our welding and quality management improvements. They believe that SiRFULL | Welding® provides significant advantage for our quality. We measure an increase in some efficiency rates between 30% to 75% for all the positions across the production chain.*»

Mikaël Clermidy, Manufacturing Engineer

ABOUT SIRFULL

The alliance between industry & IT expertise

Since 2012, Sirfull offers innovative software solutions dedicated to industrial asset management. SiRFULL solutions were born from an exceptional meeting between industry experts (welding and pressure engineers IWE and IWT, inspectors) and IT engineers. Your satisfaction is our main goal. Therefore, we provide both customized and standardized software solutions that fit your budget. Sirfull has a R&D division which elaborates various innovative projects at European level.
