

VSI HoloMedicine®

Experience Collaborative Medicine

Improve patient outcomes, augment the clinical experience for physicians, and educate the doctors-of-tomorrow on VSI HoloMedicine®.

The new medical standard of today requires innovative technology to ensure better patient outcomes. VSI HoloMedicine® enables clinicians to visualize medical images in 3D Augmented Reality for surgical planning, patient education, patient rounds and academic demonstrations. Imaging types include CT, MRI, CBCT, SPECT, PET/CT, Angio-CT and many more.

ADVANTAGES:

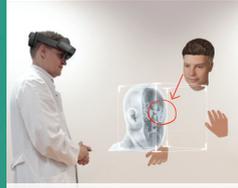

- Improvement of anatomical orientation
- Faster localization of pathology
- View bone and soft tissue structures from all angles
- Improves patient safety and patient care
- Digitalization of clinical processes increases efficiency
- Quality assurance and protection of employees through 3D Telemedicine
