Operations Management Smart System (OMSS)

Since 1994
25
years

GROUP
SALTO
intelligent technology

Cloud, smart and finally easy-to-use multidevice
technology for operations management

Move into the Digital Era of your Business
Operations with SOM

SOM Operations

Optimize the management of incidents, tasks, maintenance,... in all the operations of your organization.

- 1 Manage, distribute, track, plan and optimize**
Create and monitor any workflow to improve your company management. Dispatch events or actions automatically when needed.
- 2 Connect everything**
Connect any device, sensor or enterprise system in order to collect data and trigger tasks, jobs or work orders.
- 3 Predict, not just react**
Predict needs, detect trends and set up intelligent work sequences thanks to Machine Learning Algorithms.
- 4 Access and receive relevant data, anytime, anywhere**
Access, receive and process real-time information from your connected assets and from users with reporting permissions.
- 5 Make data based decisions**
Make business decisions based on real data displayed on user-friendly management dashboards.

And more...

- File management
- Tasks and project management
- Partners management
- Staff holidays and leave management
- Expenses management

Easy, fast and
smart
operations
management

Benefits

- Easy management and scaling up
- Shorter response time
- Faster stating up new tasks
- Increased productivity
- Optimized workload and processes
- Integrated partners operations
- Real transparency
- No more guess work
- Reduced costs
- Improved customer and employee satisfaction

Improving your
company
management
with smart technology

Efficiency and productivity

Technology

Cutting-edge technology for human beings

100% cloud-based

A solution that has been fully developed in the cloud to dispense with internal systems management.

Accurate Geolocation

With integrated maps that provide real-time location information.

Machine Learning

With automatic learning algorithms that allow the creation of predictive management models.

Big Data

Analysis and exploitation of large amounts of data.

Connected with medical robots, virtual assistants and personal trackers

With real-time dashboards and analytics for decision making.

Multi-device

Accessible from web, Android, iOS, counters and data loggers from the market.

Available off-line

Can be used without internet connection.

Multi-language

For international projects and organizations.

Since 1994, we have been dedicated to providing global services, adding value to ICT, through implementation, evolution and maintenance.

We have grown to provide more flexible solutions to our customers, achieving a leading role as well as being a point of reference.

Our speed, flexibility, quality and commitment endorse us.

+25k Automated operations/month
+300 Specialized engineers

Business efficiency

We are committed to digitalization, optimization and open innovation.

More comfortable homes

We know that the digital and virtual revolution will become indispensable in everyday life.

Sustainable cities

Where people take care of cities and cities take care of people.

Multidisciplinary team

Technical profiles together with design and business development.

Experience and sectoral knowledge

+25 years in the main economic sectors.

Continuous Innovation

Innovative technology adapted to each requirement.

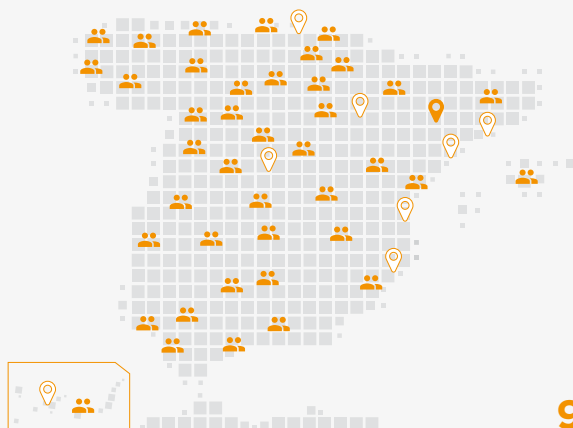

IoT & Big Data

Software and connected devices generating and using data.

Artificial intelligence

Technology with automatic learning algorithms.

Corporate headquarters

Parc Científic i Tecnològic de Lleida.
Edifici TIC, oficina 3
25003 Lleida

Operations Centre

Polígon Industrial
Camí dels Frares, calle K,
parcel·la 21, nau 15
25191 Lleida

Management

Carrer Lleida, 60
25141 Torregrossa
