

# New Microsoft 365 email security keeps the wheels on the bus going around and around

*“(VVTA was using Microsoft 365 alone) before MailGuard 365. We received a lot of malicious emails, and we did have an incident with a ransomware attack. It was a nightmare having to deal with it.*

*We experience a near miss roughly every two months, but the Finance and Exec teams get hit regularly.*

*Cybercriminals want to extract money, so they’re the targets. They phish heavily to the finance department, so we have to be very proactive, so there’s a lot of training with cybersecurity and cyber training. So, we have trained the staff on what to look out for.*

*We were tired of the constant phishing and targeted attacks. The same for our Executive team. Once cybercriminals work out who your CEOs, and Directors and Executives are, once they get targeted, they never stop. They’ll just keep adapting and making variations to their emails. But MailGuard 365 (as an added layer in our M365 security stack) has helped tremendously.*

*It’s been working great, and near misses have gone down tremendously since using MailGuard 365, so that’s a big plus.*

**SENIOR NETWORK ADMINISTRATOR, VVTA**

## At-a-glance:

**Customer:** Victor Valley Transit Authority

**Website:** <https://vvta.org>

**Country:** United States

**Industry:** Transportation

**Products and Services:** Public Transit

*"If you own a mid to large tier business, you need MailGuard 365 to fortify your defences, because if you don't, it will cost you in the long run. Too many businesses think it won't happen to them. "*

– SNR. NETWORK ADMIN, VVTA (VICTOR VALLEY TRANSIT)

## The problem

*"Cybersecurity is critical to VVTA. We are a public transportation authority, and we want to make sure all the network resources are available 365 days a year, 24/7.*

*There are always documents and links being opened and clicked. Cybersecurity has changed tremendously over the past few years. With ransomware becoming a lot more prevalent, it's changed the landscape entirely.*

*We must always be vigilant about what's out there."*

## Key benefits:

### Single-click Activation

Frictionless activation provides enterprise-wide protection. No download required as MailGuard 365 is built on Microsoft Azure and is activated in the Microsoft marketplace with your Microsoft credentials. Get started with a single click, stopping advanced email threats immediately.

### Evidence-based reporting

Complementing upstream security services like the Microsoft 365 security stack and other third-party email security vendors, MailGuard 365 takes a new approach. This means it is last to inspect emails, allowing for world first evidence-based reporting that demonstrates its stopping power.

### No end-user training

Designed to provide peace of mind to end-users and IT admins, MailGuard 365 works in the native M365 environment with no set-up headaches. Threats are moved to the users' junk and deleted items folders, so no additional training is required.

## The MailGuard 365 difference

Speed to detect and stop sophisticated email threats is the advantage of using MailGuard 365 with the Microsoft 365 security stack (including Microsoft Defender).

Proven to stop zero-day email threats up to 48 hours faster, MailGuard 365 strengthens your Microsoft 365 email security against advanced phishing, ransomware and sophisticated BEC attacks. A pioneer in cloud email security since 2001 and ISO/IEC 27001:2022 certified, it combines specialist cloud email security expertise and IP from MailGuard, with the best of Microsoft, delivering a native ICES (Integrated Cloud Email Security) solution to protect businesses in a single click. Co-built with the team at Microsoft to protect 345+ million users, it delivers enhanced 'defense-in-depth' protection for Microsoft 365 customers.
