XAMUN

AI-Powered Software Development

What's your BIG IDEA?

Tell us what you want to build

2 Step Approach to Achieving Your Planned Digital Offering

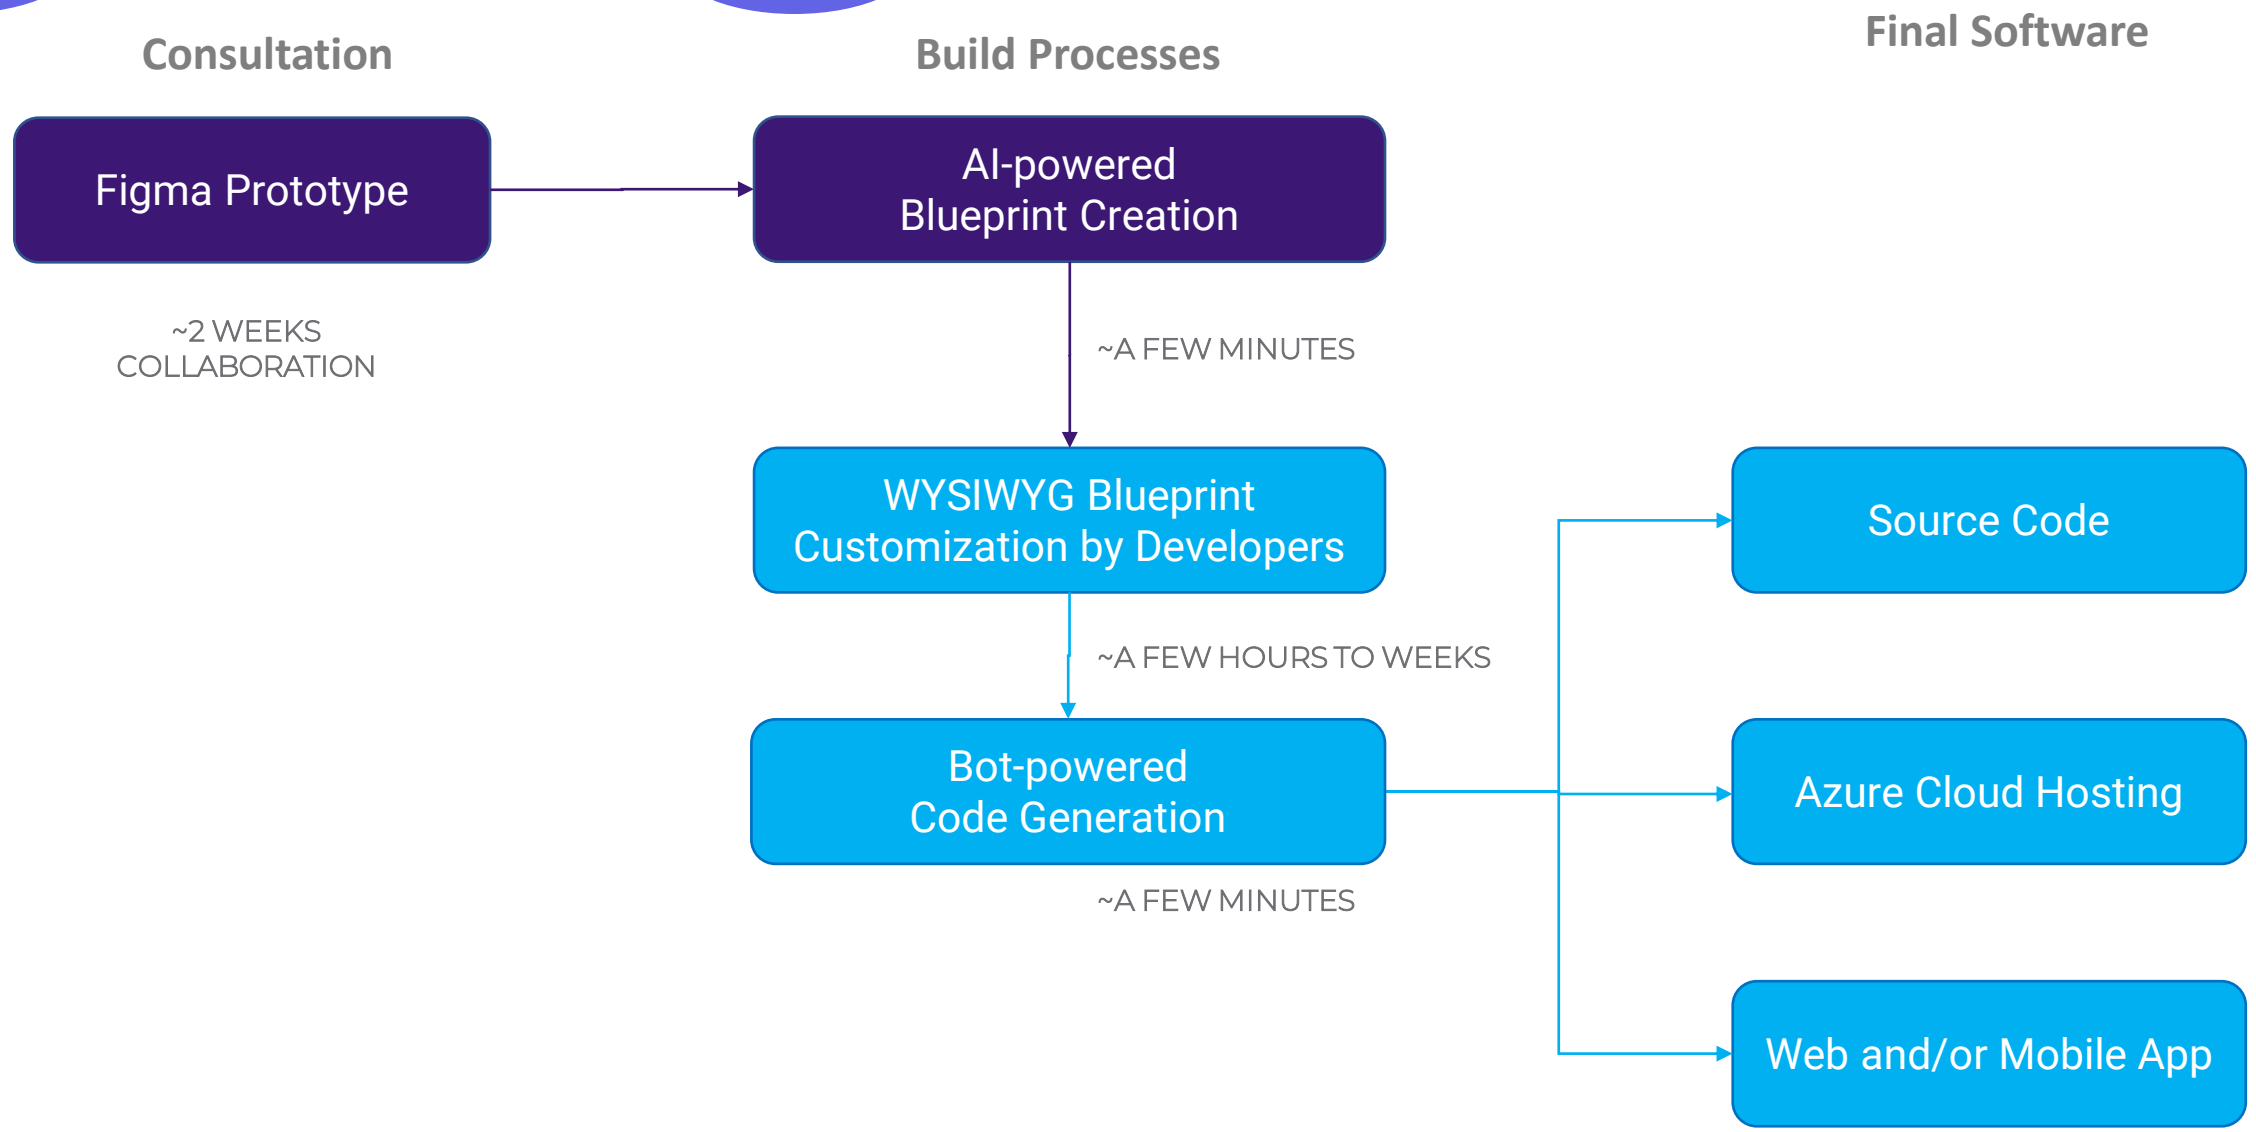
Co-Design your own software

Have custom web/mobile software built in weeks using our proprietary AI-powered development platform

How Xamun Works: A Detailed View

Step 1 **Design First Approach**

Step 2 **AI powered Software Delivery**



Our Design-First Build Process

Get the speed and simplicity of a low-code app builder, but the customizability & sophistication only a dev shop can provide

1

Prototype using Figma

~2 WEEKS COLLABORATION

2a

AI builds your software's blueprint

~A FEW MINUTES

2b

Our experts customize it

~A FEW HOURS TO A FEW WEEKS INTERNAL PROCESS

2c

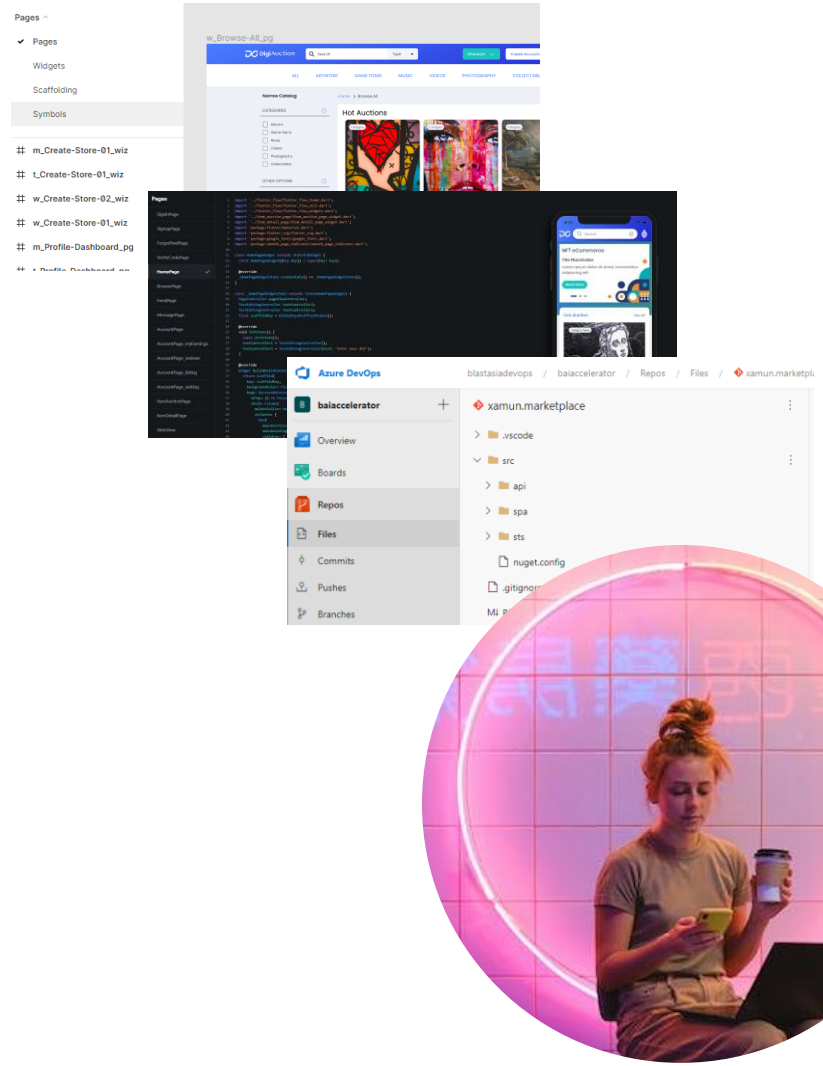
Bots bring everything together

~A FEW MINUTES

2d

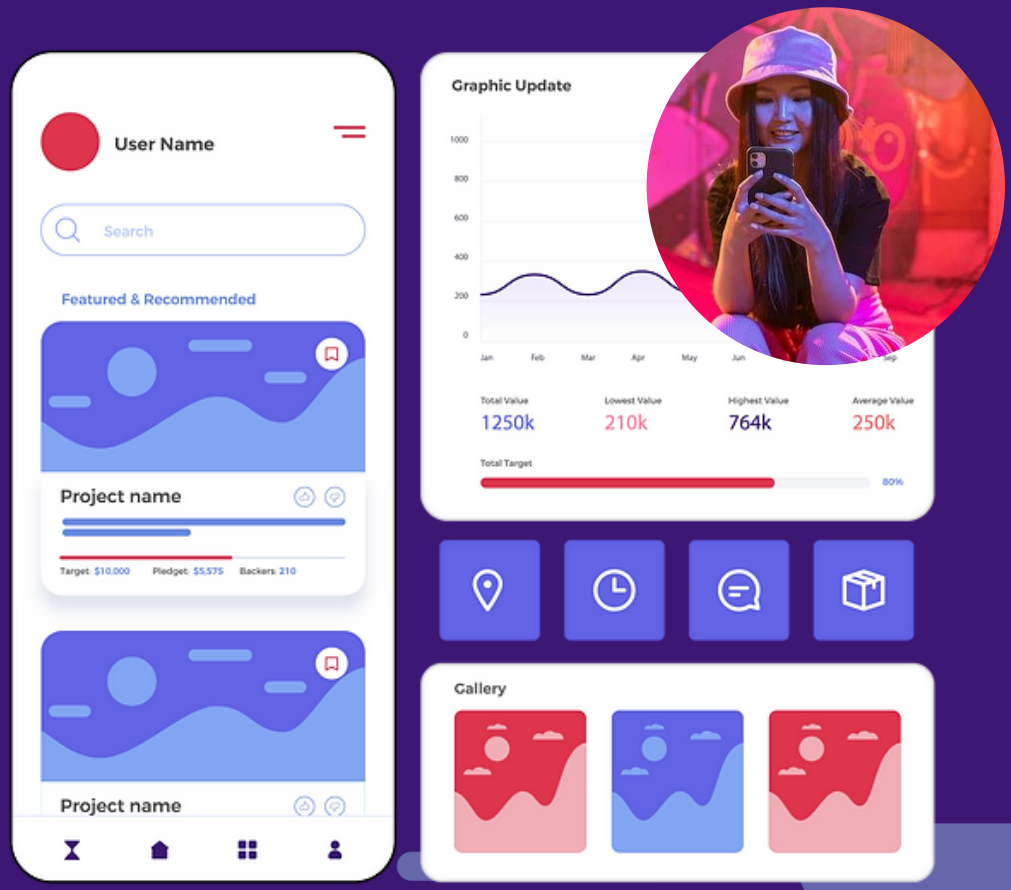
Ready for liftoff 🚀

1-2 DAYS COLLABORATION & HANDOVER



Xamun builds custom web and/or mobile software in 6-8 WEEKS using our own AI-powered development platform

- 20x faster build through AI-assisted expert team
- Co-design the prototype of your own software
- Under 1 week implementation with less rework & bugs
- Easy to enhance/upgrade – DIY or with our team



Other things about building with Xamun

Custom-built web/mobile app minus the headache, unacceptable timelines, and price tag

Fixed & predictable costs

Unlike most no-code or low-code platforms, you won't need to pay a recurring fee to use the software built on Xamun

You own the intellectual property and code

Unlike in no-code platforms, you will take ownership of the resulting IP. We can deploy and maintain your app for you or simply handover the code to your team.

More customized than no-code

No-code platforms produce relatively simple software, but with Xamun you can build more complex solutions that fit better with your business requirements

Well-documented, & human-readable source code output

The source code will be easy to work with, ensuring that enhanced or new features can be added easily by any team

CASE STUDY

Cyber Insurance Brokerage Platform

Client Country: United States
Project Duration: 2022 (< 2 months)
Project Description:

An insurance company wanted to launch their own cyber insurance brokerage platform, without the risks and costs associated into building one ground-up. The platform's goal is to help businesses find the best cyber insurance policies for their needs, connecting customers with their partner cyber insurance brokers who can provide tailored advice and guidance on which policies are best for them.

They tapped Xamun to build the platform, and **it took ~8 weeks to build the software**:

- Cyberinsurance coverage applications
- Prediction of customer's coverage needs and risk levels
- Access the Broker Support team to get advice on managing cyber risk for customers
- Financial damage calculator outlining insuring limits for each insured
- Customers portal: viewing of policy details, billing history, request filing and tracking for endorsements and cancellations, and payment processing
