Accolite

Where fearless ideas deliver exceptional value.

Discover boundless digital possibilities.

Emerging technologies, proven processes and deep expertise create unlimited opportunity for growth and reinvention. We see beyond current constraints and do things differently, amplifying new horizons of potential and pushing the boundaries of what's possible for exponential success.

Experts in design-led digital engineering, we thrive on our clients' most complex challenges. We combine unrivaled industry experience with ingenuity to create business results that matter and value that endures.

We take you further, faster.

3,000
Technical, domain and business experts

12
Fortune 500 companies as our clients

90%
Revenue from repeat customers

Led by a team of fearless thinkers.

Deep Domain Expertise

We are engineers that understand business, specialists in the industries we serve. We know your challenges - almost as well as you do.

100% Customer First

Our customer relationships are collaborative and high touch. Our clients are true partners, involved in ideation and design

Top 1% Talent

Our hiring bar is high, and we employ the best technical minds in the industry. Promotion is based on competence, not tenure, ensuring ongoing excellence.

Digital First

Our purpose is to simplify the digital journey for clients and find seamless solutions to complex business problems.

Modernize with state-of-the-art digital services.

Cloud & DevOps

Cloud computing is the fuel that drives the digital transformation engine. It offers businesses scalable storage, enables flexible computing power and encourages rapid experimentation, without technical debt.

No matter where you are in your cloud journey, we'll help you accelerate your digital transformation by leveraging cloud architecture, engineering, SecOps, FinOps and DevOps.

Digital Product Engineering

Product and service companies are at a critical juncture as traditional development processes evolve, timelines shorten, customer expectations rise, competition intensifies, and mergers and acquisitions become the norm.

We're here to help. Our digital product engineering services enable you to enhance your core competencies and deliver satisfying user experiences while we manage your product lifecycle process.

Data & AI

Knowledge is power. To succeed today and tomorrow, businesses must harness the potential of their data collection, build predictive models, and make informed strategic decisions.

At Accolite, we work alongside the world's leading enterprises to realize untapped opportunities through our deep data & AI experience. We leverage our data-capture, storage & analysis capabilities as well. Let our team of experts help you discover new avenues for growth.

Customer Experience & Design

Businesses often struggle to navigate leads through the digital customer journey due to preventable challenges like poor interface usability, disjointed customer experiences, limited in-house capabilities, or lack of data. With the right digital engineering partner, common pain points become a thing of the past.

We're that partner. Accolite can help you create high-impact products and experiences that unlock value quickly and drive business growth long-term.

Engineering, technology, and design that exceed what's possible.

Engineering for growth

Our solutions centralize and automate processes, condense time to market, leveraging economies of scale and create new revenue streams.

Amplify efficiency and operational impact

Scalable technologies, deeper integrations, optimized business processes and economies of scale and more come together to keep you ahead of the competition.

Expand sales, adoption, and engagement

From innovative new applications and mobile platforms to risk management systems, our methodology and experience enables us to amplify engagement for measurable results.

Optimize the existing.
Conceptualize the new.
Reveal the unknown.

We developed in-memory processing for real-time post trade accounting. The new system enabled quant trading growth for Prime Brokerage.
