Introduction

Why Stackgenie?

Business Transformation Success

At Stackgenie, we help our clients achieve business transformation success by combining proven industry talent expertise with project and service ownership, delivery and reporting. Making sure their projects and services are done right, and on time.

We assist our clients in everything from corporate planning and consultancy to implementation and transition operations. We are familiar with the governance, practical, budgetary and resource/ skills restrictions that organisations face and have developed successful solutions to manage these constraints as part of all our client engagement.

Our Strategic

Technology Partnerships

Gold Microsoft Partner

Microsoft

kubernetes CERTIFIED SERVICE PROVIDER

CLOUD NATIVE COMPUTING FOUNDATION SILVER MEMBER

kubecost

Stackgenie

Major focus area

Cloud Platform Build and Migration

Prime your business for scalable and accelerated growth through cost-optimized cloud platform solutions. Partner with us to harness the power of unlimited cloud computing.

Security and DevSecOps

Experience the security of protected software development without compromising on agility. Partner with us for faster innovation with security.

Kubernetes as a Service

When you partner with Stackgenie, you gain access to tried-and-true best practices for all facets of Kubernetes-based operations.

Managed Services

Elevate your potential to innovate and race ahead of the competition by expanding your team of reliable IT experts. Access cost-optimized solutions to augment your team power.

Our Strategic

Acceleration Strategy

AGGREGATE

We aggregate information on your industry, product/-service, and customer.

STRATEGIZE

Our industry experts strategi-cally migrate high-benefit, low-risk components to the cloud, providing maximum value for your business.

MVP

We test the options to zero down on the best

BUILD

We scale up the develop-ment to cover the needs identified.

INNOVATE

We engage in relentless innovation to ensure that your business benefits from the best technology available..

What is Kubernetes

And What we do?

Businesses today are moving to containers and Kubernetes to improve delivery metrics, accelerate digital transformation, and decrease time to market. This transition to a modern application framework often leaves businesses struggling with challenges — from having to balance streamlining the delivery of critical applications and infrastructure with delivering meaningful results to their customers and shareholders. .

We automate end-to-end delivery pipeline across multi-cloud platforms for faster time to market, increased efficiency and reduced cost. Our Kubernetes solutions assist businesses in quickly and reliably achieving their objectives while delivering high-quality software-based goods and services. With the help of Stackgenie's extensive Kubernetes engineering services, you can achieve your business objectives by creating applications at the speed of business.

Kubernetes Consulting Service

by Certified experts

The goal of the Kubernetes consulting is to identify more effective techniques for managing connected, dispersed components across various infrastructures. Stackgenie, the No.1 Kubernetes Consulting Services and K8s Solutions provider in the UK helped many organizations across the world to streamline their CD/CI process.

IT Cost Optimization

Containerize Monolithic Applications

Improved Application Development

POC– Agile, scalable

Managed Kubernetes Service

by Certified experts

Stackgenie offers Managed Kubernetes Services with Observability, which includes monitoring, deployment, and optimized use of Kubernetes in complicated environments.

Kubernetes Consulting and Advisory

Managed 24*7 Cluster Services

Enterprise-Grade Security

Multi-cluster Management

Hybrid Multi-Cloud Solutions

Streamline Operations and Enhance Resource Efficiency

Kubernetes Engineering Service

by Certified experts

We offer a hands-free, hassle-free Kubernetes deployment service. Along with designing and implementing Kubernetes, our team collaborates with your in-house engineers to onboard and teach them so they can effectively operate cluster-based container systems.

Adaptive Kubernetes Solutions

Every organization has different requirements and procedures, and when designing your Kubernetes architecture, our engineers will consider both your present and foreseeable workload requirements.

Multiple Platform Support

No matter where your integration of Kubernetes and containers is at the moment, you can rely on us to bring the necessary skills and resources to help you reach your modernization objectives. We offer Kubernetes deployment and support services for all significant cloud and container platforms.

Uninterruptible Kubernetes deployment

Our infrastructure and operations teams deliver a speedy, secure, and production-ready Kubernetes implementation.

Site Reliability Engineering Services

Managed services to guarantee the availability of your infrastructure and mission-critical applications with mutually agreed-upon SLO, SLI, and SLA.
