Aman Group ETERNITY

The Data Highway

The quick and sharp way towards your Data Assessment Plan,
for the best MS Data Platform architecture for your business

The exact formula for your Data strategy consulting process in your organization.
Eternity's expert team specializes in mapping the current situation and providing accurate advice on a methodological and technological action plan for the benefit of smart and efficient data management.
Let us lead you towards The Data Highway!

So how does it work?

I. Mapping the current situation

- o Mapping the data sources & the types of information available. Expectation VS reality

- o Examining covered business areas (what are the business cases from which insights can already be derived)

II. Strategy

- o Examination and mapping of business information needs in conjunction with the strategy of the desired product/platform

- o Mapping issues that require immediate response/quick needs

- o Planning a solution for the coming years by reusing products and building generic information layers for the solution

III. Technology & Architecture

- o Mapping tools using existing products + existing customer environments

- o Mapping the data flow processes

- o Work environments

- o Regulation and information Security

- o Architecture

- o Existing licensing

IV. The future is in DATA! What do you get?

- o **Data Platform Assessment document** and methodology for solution development

- o Summary of a recommendation for Microsoft Data Platform technological tools that meet the requirements **(Architecture) such as: Azure Data Factory, Azure Synapse Analytics, Azure Data Lake Analytics, Azure Databricks and more...**

- o Immediate and future work plan **(Gantt)**

- o The team required to implement the solution **(Team assessment)**

- o Recommendation for Microsoft Meta-data Management tools
