

Consulting for DevSecOps, Software Quality and integrations between platforms

ABOUT KONIA TECNOLOGIA/CONSULTING

Konia Tecnologia is a consultancy specialized in ALM / DevSecOps, Software Quality, systemic integrations and Azure functionalities relevant to Software Development.

WHAT WE OFFER

Do you want to build / release track automations? Do you want to create agile culture in your company? Want to improve the quality of your applications? Anyway, the entire software development cycle can and should be driven by one or more DevSecOps tools, which we have great knowledge.

Ensure that your project will be live with quality from the first Code Commit to the last accepted in production. Software quality is to pursue the great, yes! The good is no longer enough.

Creation of reference, migrations, containers, micro services, IASS / PASS / SASS "as-is"

Building bridges between Systems using Microsoft or non-Microsoft technologies, using Low-Code / No-Code platforms or through Code Development with Visual Studio and .NET as a base.

WHAT OUR CUSTOMERS ARE SAYING

"I thank Konia Tecnologia for all the professionalism and technical quality in delivering our migration project to Azure DevOps"

– Patrick Farani, IT Coordinator, Qualicorp

KONIA

Microsoft Azure & DevOps

Konia Tecnologia is a Gold Partner.

DevSecOps projects, Development of systemic integrations, Mixed Reality (Hololens) and ServerLess in addition to providing Software Quality from the beginning of the backlog to monitoring in production through the application of tests of the most diverse types.

WHY KONIA

Deploying ALM (DevOps) to 10 years.

Our team has been involved in the Software Development Cycle since 2006, when the Microsoft Team Foundation Server Platform was born. MVP's are part of our team, in addition to many certified professionals with experience in Software Development and Software Architecture.

Development of software integrations (Azure, Office 365, HoloLens and third parties)

"We build bridges". Konia Tecnologia specializes in integrating environments, integrating software platforms and developing "out of box" source code, including enabling Mixed Reality for devices such as HoloLens or using Power Automate (Low code) in specific situations. Among other possibilities based on Power Platform.

Software Quality

Many companies need to test their software, Konia Tecnologia has its own team that, under the Test Factory regime, manages, creates, automates, executes and even transfers knowledge on the subject. Whether using tools such as Azure DevOps Test plans, Microsoft App Center, Visual Studio or Open tools like Selenium, Spec flow, Postman among others.

Cloud (Development)

Journey of migration to cloud, micro-services, containers, API's management, functions, IOT and several other possibilities in Azure-based Development.
